PREFACE

"The Nation" is a data series designed to illustrate the scope and depth of the information collected by the 1986 Census. This is achieved by displaying considerable detail on selected variables (for example, occupation) or alternatively by crosstabulating variables to illustrate the analytical potential of the data (for example, age by sex and marital status). In addition, some tables include comparison to 1981 data and a few basic tables show data from earlier censuses.

The series consists of nineteen (19) publications. The first four (4) publications released contain basic information collected from all households on demographic, family, household and dwelling characteristics. The remainder of the publications contain data collected from a 20% sample of households. Included is information covering social, cultural, labour and income characteristics. Additional information is also available on languages, families, households and dwellings.

The series provides national coverage. Most tables include provincial and territorial data but no subprovincial data are presented.

In addition to "The Nation", there are two other data series. The "Profiles" series provides a statistical overview of a particular subprovincial area (e.g., municipality) touching on a wide selection of census variables but providing a limited amount of detail. The series "Dimensions" provides data on selected topics for which there has been considerable interest expressed such as the immigrant population, ethnic groups, etc.

PRÉFACE

"Le Pays" est une série de données destinées à illustrer l'étendue et l'ampleur des renseignements recueillis lors du recensement de 1986. Pour ce faire, certaines variables affichent un niveau de détail considérable (profession, par exemple) ou encore des croisements de variables permettent d'illustrer les possibilités analytiques des données (âge selon le sexe et l'état matrimonial, par exemple). De plus, certains tableaux présentent des comparaisons aux données de 1981 et quelques autres tableaux de base renferment des données des recensements antérieurs.

La série comprend dix-neuf (19) publications. Les quatre (4) premières publications contiennent des renseignements de base recueillis auprès de l'ensemble des ménages sur les caractéristiques démographiques et celles des familles, des ménages et des logements. Les autres publications contiennent des données recueillies auprès d'un échantillon de 20% des ménages. Ces données contiennent des renseignements sur les caractéristiques sociales, culturelles, de la maind'oeuvre et du revenu. Il y a également des renseignements supplémentaires sur les langues, les familles, les ménages et les logements.

La série recouvre l'ensemble du pays. La plupart des tableaux comprennent des données provinciales et territoriales mais ne contiennent aucune donnée infraprovinciale.

En plus de la série "Le Pays", on prévoit publier deux autres séries. Une série de "Profils" donne un aperçu statistique d'une région géographique donnée (par exemple, une municipalité) en utilisant une vaste gamme de variables du recensement, mais avec un niveau de détail limité. Une série "Dimensions" fournit des renseignements sur certains sujets qui ont suscité un intérêt considérable, tels que les immigrants, les groupes ethniques, etc.

HIGHLIGHTS

All Employment Income Recipients (Table 1)

- Between 1980 and 1985, the number of individuals 15 years and over with employment income (that is, wages and salaries and income from farm or non-farm self-employment) increased by 4.6%. While the number of male recipients of employment income increased by 1.1%, that of female recipients increased by 9.7%.
- After adjustment for inflation, the overall average employment income declined by 3% from \$19,311 in 1980 to \$18,733 in 1985. The average employment income of men dropped by 4%, but that of women rose by nearly 3%.
- Between 1980 and 1985, average employment income of individuals in the Yukon fell by 14.7% but increased by 6.9% in the Northwest Territories. Among provinces, it increased in Nova Scotia (1.7%) and Ontario (1.5%) and decreased in the remaining provinces (from 4% in Manitoba to 11% in Newfoundland).
- The decline in average employment income between 1980 and 1985 was common to all major occupations, except for those in Medicine and health, in varying degrees. The largest drop occurred in Farm horticulture and animal husbandry occupations (20%), followed by Forestry and logging occupations (14%) and Construction trades occupations (10%).

Full-year, Full-time Workers (Tables 1 and 2)

- The average employment income of full-year, full-time workers (those who worked 49 to 52 weeks in 1980 or 1985, mostly full time) declined by 1%, from \$27,049 in 1980 to \$26,781 in 1985. For those who worked less than 49 weeks, or worked mostly part time, the decline in average employment income from 1980 to 1985 was much larger at 9%.
- Full-year, full-time female workers gained over 2%, while female part-time or part-year workers experienced only a marginal decline.

FAITS SAILLANTS

Ensemble des bénéficiaires d'un revenu d'emploi (tableau 1)

- Entre 1980 et 1985, le nombre de personnes de 15 ans et plus ayant un revenu d'emploi (c'està-dire salaires et traitements et revenu d'un travail autonome agricole ou non agricole) a augmenté de 4.6%. Le nombre de bénéficiaires d'un revenu d'emploi a progressé de 1.1% chez les hommes et de 9.7% chez les femmes.
- Après ajustement en fonction de l'inflation, le revenu moyen d'emploi global a fléchi de 3%, passant de \$19,311 en 1980 à \$18,733 en 1985. Le revenu moyen d'emploi des hommes a chuté de 4% mais celui des femmes a augmenté de près de 3%.
- Entre 1980 et 1985, le revenu moyen d'emploi des particuliers au Yukon a chuté de 14.7% mais a progressé de 6.9% dans les Territoires du Nord-Ouest. Dans les provinces, le revenu a augmenté en Nouvelle-Écosse (1.7%) et en Ontario (1.5%) et diminué dans les autres provinces (les baisses étant comprises entre 4% au Manitoba et 11% à Terre-Neuve).
- Le recul du revenu moyen d'emploi entre 1980 et 1985 a été observé à des degrés divers dans tous les grands groupes de professions, à l'exception du groupe "Médecine et santé". Les plus fortes baisses se sont produites chez les agriculteurs, horticulteurs et éleveurs (20%), les travailleurs forestiers et bûcherons (14%) et les travailleurs du bâtiment (10%).

Travailleurs à plein temps toute l'année (tableaux 1 et 2)

- Le revenu moyen d'emploi des travailleurs à plein temps toute l'année (ceux qui, en 1980 ou en 1985, ont travaillé entre 49 et 52 semaines surtout à plein temps) a baissé de 1%, ayant passé de \$27,049 en 1980 à \$26,781 en 1985. Chez ceux ayant travaillé moins de 49 semaines, ou ayant surtout travaillé à temps partiel, le recul du revenu moyen d'emploi de 1980 à 1985 a été beaucoup plus important, soit 9%.
- Les femmes ayant travaillé à plein temps toute l'année ont bénéficié d'une augmentation de plus de 2%, alors que celles ayant travaillé à temps partiel ou une partie de l'année ont vu leur revenu légèrement diminuer.

- Full-year, full-time male workers experienced a small decline of less than 1% in real average employment income, but part-year or part-time male workers experienced a decline of nearly 13% in their average employment income.
- For full-year, full-time workers, the ratio of female to male average earnings rose from 63.8% in 1980 to 65.5% in 1985.
- The gap between the earnings of full-year, fulltime male and female workers varied substantially by different factors. For example, the female to male earnings ratio in the 15-to-24 age group was 82.2% and declined with age to 60.9% for the 45-64 age group. In contrast, the female to male earnings ratio increased with the level of education from 61.1% for those with less than a Grade 9 education to 67.6% for those with a university degree. Average employment income of women 15 to 24 years with a university degree was 89.2% of the average for similar men.
- Although, overall, women accounted for 35% of all full-year, full-time workers in 1985, their proportions in certain occupations were significantly higher: Clerical and related occupations (75%), Medicine and health occupations (72%) and Teaching and related occupations (53%). The respective female to male earning ratios in these occupations were 73.8%, 48.0% and 78.2%.
- Women were more concentrated in lower paying categories within these three major occupation groups. For example, within the Medicine and health group, women accounted for 18% in Health diagnosing and treating occupations with an earning ratio of 58.1%, and for 87% in Nursing, therapy and related assisting occupations with an earning ratio of 97.6%.

- Les hommes ayant travaillé à plein temps toute l'année ont connu un léger fléchissement de moins de 1% de leur revenu moyen d'emploi réel, mais ceux ayant travaillé une partie de l'année ou à temps partiel ont accusé une baisse de près de 13% de leur revenu moyen d'emploi.
- Chez les travailleurs à plein temps toute l'année, le ratio des gains moyens chez les femmes par rapport à ceux des hommes est passé de 63.8% en 1980 à 65.5% en 1985.
- Chez les travailleurs à plein temps toute l'année, la différence entre les gains des hommes et ceux des femmes varie considérablement selon différents facteurs. Par exemple, le ratio des gains des femmes aux gains des hommes est de 82.2% chez les 15 à 24 ans et de 60.9% chez les 45-64 ans. Par contre, le ratio des gains des femmes aux gains des hommes augmente avec le niveau de scolarité, passant de 61.1% chez ceux n'ayant pas atteint la 9e année à 67.6% chez les diplômés universitaires. Le revenu moyen d'emploi des femmes de 15 à 24 ans détenant un diplôme universitaire représentait 89.2% de la moyenne chez les hommes du même groupe d'âge ayant les mêmes compétences.
- En 1985, 35% de tous les travailleurs à plein temps toute l'année étaient des femmes. Cependant, la proportion de femmes était beaucoup plus grande dans certaines professions, atteignant 75% chez les employés de bureau et travailleurs assimilés, 72% chez les personnes spécialisées en médecine et en santé et 53% chez les enseignants et le personnel assimilé. Les ratios des gains des femmes aux gains des hommes dans ces professions s'établissaient à 73.8%, 48.0% et 78.2% respectivement.
- Les femmes se retrouvaient en plus grand nombre dans les catégories les moins rémunérées à l'intérieur de ces trois grands groupes de professions. Par exemple, à l'intérieur du groupe de la médecine ou de la santé, les femmes figuraient pour 18% du personnel spécialisé dans le diagnostic et le traitement des maladies où le ratio des gains des femmes aux gains des hommes était de 58.1%, et pour 87.7% du personnel spécialisé et des auxiliaires des soins infirmiers et thérapeutiques, où le ratio était de 97.6%.

- Among full-year, full-time workers, physicians and surgeons recorded the highest average employment income in 1985 at \$85,023. Judges and magistrates ranked second, with an average employment income of \$76,019, followed by dentists at \$75,792. Average employment income for the 10 highest paying occupations taken together was \$60,537 in 1985.
- For male full-year, full-time workers in these occupations, employment income averaged \$63,909 while, for females, it was \$38,493.
- Compared with their overall proportion of 35% among all full-year, full-time workers, women represented only 13% of workers in the 10 highest paying occupations.
- In contrast, 67% of all full-year, full-time workers in the 10 lowest paying occupations in 1985 were women. Most of these were service occupations, with an overall average employment income of \$11,309 in 1985.

Wages and Salaries of Paid Workers (Table 3)

- The average wages and salaries of all paid workers in 1985 was \$18,645. It was \$23,222 for men and \$13,016 for women.
- The average wage for full-year, full-time male paid workers was \$30,825 and \$20,169 for females.
- Of all male paid workers, 13% were concentrated in Managerial, administrative and related occupations with an average wage of \$38,410, 11% were in Service occupations with an average wage of \$15,854 and 10% were in Product fabricating, assembling and repairing occupations with an average wage of \$21,978.
- In contrast, female paid workers were concentrated in Clerical and related occupations (35%) with an average wage of \$12,718, in Service occupations (16%) with an average wage of \$7,223 and in Sales occupations (9%) with an average wage of \$9,519.

- Chez les travailleurs à plein temps toute l'année, les médecins et chirurgiens ont enregistré le revenu moyen d'emploi le plus élevé en 1985, soit \$85,023. Les juges et magistrats occupent le deuxième rang, avec un revenu moyen d'emploi de \$76,019, suivis des dentistes, avec \$75,792. Le revenu moyen d'emploi pour les 10 professions les mieux rémunérées était de \$60,537 en 1985.
- Le revenu moyen d'emploi des personnes exerçant ces professions et ayant travaillé à plein temps toute l'année a été de \$63,909 chez les hommes et de \$38,493 chez les femmes.
- Alors qu'elles représentent 35% de tous les travailleurs à plein temps toute l'année, les femmes n'interviennent que pour 13% des travailleurs dans les 10 professions les mieux rémunérées.
- Par contre, 67% de tous les travailleurs à plein temps toute l'année dans les 10 professions les moins bien rémunérées en 1985 étaient des femmes. Il s'agissait surtout de travailleurs spécialisés dans les services, le revenu moyen d'emploi de ce groupe en 1985 ayant été de \$11,309.

Salaires et traitements des travailleurs rémunérés (tableau 3)

- La moyenne des salaires et traitements des travailleurs rémunérés en 1985 a été de \$18,645. Elle a été de \$23,222 chez les hommes et de \$13,016 chez les femmes.
- La salaire moyen des personnes ayant travaillé à plein temps toute l'année a été de \$30,825 chez les hommes et de \$20,169 chez les femmes.
- De tous les hommes travaillant contre rémunération, 13% se retrouvaient chez les directeurs, gérants, administrateurs et le personnel assimilé où leur salaire moyen était de \$38,410, 11% se retrouvaient chez les travailleurs spécialisés dans les services (salaire moyen de \$15,854) et 10% se retrouvaient chez les travailleurs spécialisés dans la fabrication, le montage et la réparation de produits (salaire moyen de \$21,978).
- Par contre, les femmes travaillant contre rémunération se retrouvaient principalement chez les employés de bureau et travailleurs assimilés (35%) où leur salaire moyen était de \$12,718, chez les travailleurs spécialisés dans les services (16%) avec un salaire moyen de \$7,223 et chez les travailleurs spécialisés dans la vente (9%) avec un salaire moyen de \$9,519.

GUIDELINES FOR USING THIS PUBLICATION

PURPOSE

This publication presents information from the 1986 Census of Population on the 1985 average employment income and average wages and salaries by detailed occupation of the population 15 years and over. These statistics are also provided for full-year, full-time workers and are classified by sex, age groups and highest level of schooling.

ORGANIZATION OF THE PUBLICATION AND TABLE DESCRIPTIONS

This publication consists of three tables as described below.

Table 1 presents comparable average employment income statistics from the 1981 and 1986 Censuses for the population 15 years and over by sex and detailed occupation. The 1980 incomes were converted into 1985 dollars by making an adjustment for the change in the Consumer Price Index between 1980 and 1985. The statistics are presented separately for all persons with employment income and for those who worked full year, full time.

Table 2 provides data for the population 15 years and over who worked full year, full time in 1985 by sex, age and highest level of schooling and presents their 1985 average employment income by detailed occupation.

Table 3 shows 1985 average wages and salaries of all paid workers and of those who worked full year, full time in 1985 by sex and detailed occupation.

A detailed legend of occupation code descriptions is shown in Appendix 2.

Definitions of the terms and concepts used are provided in the "Definitions" section at the end of the publication.

LIGNES DIRECTRICES POUR L'UTILISATION DE CETTE PUBLICATION

BUT

La présente publication donne des renseignements, tirés du recensement de la population de 1986, sur le revenu moyen d'emploi en 1985 et sur les salaires et traitements moyens selon les professions détaillées pour la population de 15 ans et plus. Ces statistiques sont également fournies pour les personnes ayant travaillé à plein temps toute l'année selon le sexe, le groupe d'âge et le plus haut niveau de scolarité atteint.

ORGANISATION DE LA PUBLICATION ET DESCRIPTION DES TABLEAUX

La présente publication renferme trois tableaux tels que décrits ci-dessous.

Le tableau 1 présente des statistiques comparables du revenu moyen d'emploi, tirées des recensements de 1981 et 1986, pour la population de 15 ans et plus selon le sexe et la profession détaillée. Les revenus de 1980 ont été convertis en dollars de 1985 en effectuant un ajustement pour le changement dans l'Indice des prix à la consommation entre 1980 et 1985. Les chiffres sont donnés séparément pour toutes les personnes ayant un revenu d'emploi et pour celles ayant travaillé à plein temps toute l'année.

Le tableau 2 renferme des données sur la population de 15 ans et plus ayant travaillé à plein temps toute l'année en 1985 selon le sexe, l'âge et le plus haut niveau de scolarité. Il donne également leur revenu moyen d'emploi en 1985 selon la profession détaillée.

Le tableau 3 montre les salaires et traitements moyens en 1985 de tous les travailleurs rémunérés et de ceux ayant travaillé à plein temps toute l'année en 1985 selon le sexe et la profession détaillée.

Une légende détaillée des codes de professions est donnée à l'annexe 2.

Les définitions des termes et des concepts utilisés sont offertes dans la section "Définitions" à la fin de l'ouvrage.

GEOGRAPHIC AND CONTENT CONSIDERATIONS

Count discrepancies between 100% data and 20% sample data: Counts of the population, households, dwellings or families shown in tabulations based on a 20% sample may differ from those collected on a 100% basis for the following reasons:

- (1) The exclusion of institutional residents: Institutional residents are defined as those individuals other than staff members and their families who live in institutional collective dwellings such as homes for the elderly, hospitals and correctional institutions. Detailed sample data were not collected from this sector of the population.
- (2) Weighting: Data collected on a sample basis were weighted up to provide estimates of the entire population. However, weighted counts are subject to sampling variability. This means, for any given area, the weighted count may differ from that shown in tabulations containing data collected on a 100% basis. While the differences are relatively small for geographic areas with large populations, they can be greater for areas with small populations. For further information on this topic, please contact Social Survey Methods Division at Statistics Canada, Ottawa, Canada K1A 0T6 (613) 951-6929.

Users should also be aware that differences in counts may be due to the different subpopulations or universes for which the data are reported. For example, mobility data are reported for persons 5 years and over excluding those temporarily residing overseas; education and labour force data are reported for persons 15 years and over. Furthermore, data may be produced for subsets of these education and labour universes such as total labour force, employed labour force, etc. Similar differences may occur in tabulations for households, dwellings or families. The 1986 Census Dictionary (Catalogue No. 99-101E or F) provides more detailed information on universes or subpopulations by variable.

FACTEURS DE GÉOGRAPHIE ET DE CONTENU

Divergences des chiffres entre les données intégrales et les données-échantillon (20%): Les chiffres de la population, des ménages, des logements ou des familles des tableaux utilisant les données-échantillon (20%) peuvent différer des données intégrales pour les raisons suivantes:

- (1) L'exclusion des pensionnaires d'institution: Ces derniers sont définis comme les personnes autres que les membres du personnel et de leurs familles qui vivent dans les logements collectifs tels que les foyers pour personnes âgées, les hôpitaux et les établissements de correction. On n'a pas recueilli de données-échantillon détaillées pour ce segment de la population.
- (2) Pondération: Les données-échantillon sont pondérées afin d'obtenir des estimations de la population tout entière. Cependant, les chiffres pondérés se caractérisent par la variabilité d'échantillonnage, ce qui signifie que pour toute région donnée, le chiffre pondéré peut différer de celui qui figure dans les tableaux contenant les données intégrales. Bien que les différences soient relativement faibles pour les régions géographiques ayant de fortes populations, elles peuvent être plus importantes dans le cas des régions avec de petites populations. Pour plus de sujet, renseignements sur ce veuillez communiquer avec la Division des méthodes d'enquêtes sociales de Statistique Canada, Ottawa, Canada K1A 0T6 (613) 951-6929.

Les utilisateurs doivent également noter que les différences de chiffres peuvent s'expliquer par les différences de sous-population ou d'univers dont les données sont publiées. Ainsi, les données de la mobilité sont publiées pour les personnes âgées de cinq ans et plus, excluant celles qui résident temporairement outre-mer; les données sur la scolarité et l'activité ne sont déclarées que pour les personnes âgées de 15 ans et plus. De plus, des données peuvent être produites pour les sousensembles de ces univers de la scolarité et de l'activité tels que la population active totale, la population active occupée, etc. Des différences similaires peuvent se glisser dans les tableaux pour les ménages, les logements ou les familles. Le Dictionnaire du recensement de 1986 (nº 99-101F ou E au catalogue) contient plus de renseignements détaillés sur les univers ou les sous-populations par variable.

Incompletely enumerated Indian reserves and Indian settlements: On some Indian reserves or settlements, census enumeration was not permitted or was interrupted. Therefore, data are not available for these reserves and tables have been footnoted accordingly. This issue is discussed more fully in the SPECIAL NOTES section.

Additional information on geographic and content considerations, definitions of terms, explanations of data quality, etc., may be found at the end of this publication immediately following the tables (see pink pages). This information is presented separately in English and French sections for easier use.

1986 CENSUS PRODUCTS AND SERVICES

The 1986 Census product line is designed to serve the diverse needs of our users. Using as a base the most demanded publications of past censuses, a full series of data, reference and analytical publications will be offered.

In addition to the tabulations shown in publications, census data are available in machine-readable form. In particular, there is a set of 44 basic summary tabulations for small geographic areas including enumeration areas, census tracts and census subdivisions. The data contained in the published profiles for census subdivisions and census divisions, census tracts, federal electoral districts, census metropolitan areas and census agglomerations are also available in machine-readable form.

While many tabulations are available from the planned output program, census tabulations can also be customized to individual users' needs. A range of products is offered, from predetermined basic data tabulations available for user-selected geographic areas, to complete custom tabulations which are developed to the exact requirements of the client. The products thus offer, on a cost-recovery basis, varying levels of flexibility in content, geography and medium.

Réserves indiennes et établissements indiens partiellement dénombrés: Dans certaines réserves indiennes et établissements indiens, les recenseurs n'ont pas eu la permission d'effectuer le dénombrement ou ont dû l'interrompre. Les données ne sont donc pas disponibles pour ces réserves et des notes au bas des tableaux apparaissent selon le besoin. Pour des précisions à ce sujet, voir la section NOTES SPÉCIALES.

Vous trouverez d'autres renseignements complémentaires sur les facteurs de géographie et de contenu, la définition détaillée des termes, des précisions sur la qualité des données, etc., à la fin de la publication, immédiatement après les tableaux (voir les pages roses). Ces renseignements sont présentés dans des sections française et anglaise distinctes, ce qui en facilite la consultation.

PRODUITS ET SERVICES DU RECENSEMENT DE 1986

La gamme des produits du recensement de 1986 doit répondre aux besoins variés de nos utilisateurs. En fonction des publications les plus populaires des derniers recensements, nous offrirons une série complète de données, de documents de référence et d'ouvrages analytiques.

En plus des totalisations présentées dans les publications, les données du recensement sont disponibles sous forme lisible par machine. Notamment, une série de 44 totalisations sommaires de base existe pour les petites régions géographiques comprenant les secteurs de dénombrement, les secteurs de recensement et les subdivisions de recensement. Les données contenues dans les profils publiés pour les subdivisions de recensement et les divisions de recensement et les divisions de recensement, les circonscriptions électorales fédérales, les régions métropolitaines de recensement et les agglomérations de recensement sont également disponibles sous forme lisible par machine.

Même si plusieurs totalisations sont disponibles à partir du programme des produits déjà établi, des totalisations du recensement peuvent également être personnalisées selon les besoins de l'utilisateur. Il est possible de se procurer une gamme de produits allant des totalisations de données fondamentales, déterminées à l'avance, disponibles pour les régions géographiques choisies par l'utilisateur, à des totalisations entièrement personnalisées et préparées selon les exigences précises du client. Ainsi, ces produits permettent d'offrir, contre recouvrement des coûts, différents niveaux de souplesse en matière de contenu, de géographie et de support.

OTHER INCOME DATA PRODUCTS

There are several other products from the 1986 Census which contain income data. These include:

NATION SERIES

Total Income: Individuals (Catalogue No. 93-114)

This publication presents 1985 income size distributions for the population 15 years and over by sex, age, marital status, sources of income, major source of income, highest level of schooling, period of immigration, mother tongue, ethnic origin and major field of study. One table also includes 1980 income size distributions from the 1981 Census in constant (1985) dollars.

- Employment Income: Individuals (Catalogue No. 93-115)

This publication presents 1985 employment income size distributions for the population 15 years and over by sex, age, work activity in 1985, class of worker, number of weeks worked in 1985, highest level of schooling, major field of study, mother tongue, official language and 1985 wage and salary size distributions by sex and age. Also included is one table showing 1980 employment income size distributions from the 1981 Census in constant (1985) dollars.

 Family Income: Census Families (Catalogue No. 93-117)

This publication presents 1985 income size distributions for census families and nonfamily persons in private households by family structure, sources of income, major source of income, number and combination of employment income recipients, number of persons in the household, 1985 work activity, age, level of schooling and period of immigration. One table each for census

AUTRES PRODUITS DE DONNÉES SUR LE REVENU

Il existe plusieurs autres produits du recensement de 1986 qui contiennent des données sur le revenu. Ils sont:

SÉRIE: LE PAYS

- Revenu total des particuliers (nº 93-114 au catalogue)

Cette publication présente la répartition de la taille du revenu en 1985 pour la population de 15 ans et plus selon le sexe, l'âge, l'état matrimonial, la source de revenu, la principale source de revenu, le plus haut niveau de scolarité, la période d'immigration, la langue maternelle, l'origine ethnique et le principal domaine d'études. On y trouve également un tableau portant sur la répartition de la taille du revenu en 1980 en dollars constants de 1985, d'après le recensement de 1981.

- Revenu d'emploi des particuliers (nº 93-115 au catalogue)

Cette publication présente la répartition de la taille du revenu d'emploi en 1985 pour la population de 15 ans et plus selon le sexe, l'âge, le travail en 1985, la catégorie de travailleurs, le nombre de semaines travaillées en 1985, le plus haut niveau de scolarité, le principal domaine d'études, la langue maternelle, la langue officielle ainsi que la répartition de la taille de rémunération en 1985 selon l'âge et le sexe. On retrouve également un tableau portant sur la répartition de la taille du revenu d'emploi en 1980 en dollars constants (1985) d'après le recensement de 1981.

- Revenu de la famille: familles de recensement (nº 93-117 au catalogue)

Cette publication présente la répartition de la taille du revenu en 1985 des familles de recensement et des personnes hors famille dans les ménages privés selon la structure de la famille, la source de revenu, la principale source de revenu, le nombre et la combinaison de bénéficiaires d'un revenu d'emploi, le nombre de personnes dans le ménage, le travail en 1985, l'âge, le niveau de scolarité et la

families and non-family persons also includes 1980 income size distributions from the 1981 Census in constant (1985) dollars.

 Family Income: Economic Families (Catalogue No. 93-118)

This publication presents 1985 income size distributions for economic families and unattached individuals by family structure and family characteristics and the composition of their total income by selected characteristics. In addition, the publication includes statistics on the incidence of low income among families, unattached individuals and population in private households by a number of variables such as family size, number of children, education and ethnic origin of husband/reference person, sex and age of family members, etc. Also included are the distributions of economic families by the size of difference between their 1985 income and the applicable low income cut-off. One table each for economic families and unattached individuals also includes 1980 income size distributions from the 1981 Census in constant (1985) dollars.

- Household Income: Private households (Catalogue No. 93-119)

This publication presents 1985 income size distributions for private households by household type, tenure, number of persons, presence and number of children, source of income and selected characteristics of household maintainer. A table of 1980 household income size distributions from the 1981 Census in constant (1985) dollars is also included.

The Nation Series provides data for Canada, the provinces and the territories.

période d'immigration. Deux tableaux présentent la répartition de la taille du revenu en 1980 en dollars constants (1985) d'après le recensement du Canada de 1981: l'un porte sur les familles de recensement et l'autre, sur les personnes hors famille.

- Revenu de la famille: familles économiques (nº 93-118 au catalogue)

Cette publication présente la répartition de la taille du revenu en 1985 pour les familles économiques et les personnes seules selon la structure de la famille et les caractéristiques de la famille ainsi que la composition de leur revenu total selon certaines caractéristiques. De plus, la publication contient des statistiques sur l'incidence du faible revenu chez les familles, les personnes seules et les membres des ménages privés selon un certain nombre de variables, comme la taille de la famille. le nombre d'enfants, l'éducation et l'origine ethnique de l'époux ou la personne repère, le sexe et l'âge des membres de la famille, etc. La publication renferme également les répartitions des familles économiques selon l'importance de l'écart entre leur revenu de 1985 et le seuil de faible revenu approprié. Un tableau sur les familles économiques et un autre sur les personnes seules contiennent également les répartitions de la taille du revenu en 1980 d'après le recensement de 1981 en dollars constants (1985).

 Revenu du ménage: ménages privés (nº 93-119 au catalogue)

Cette publication présente la répartition de la taille du revenu en 1985 des ménages privés selon le genre de ménage, le mode d'occupation, le nombre de personnes, la présence et le nombre d'enfants, les sources de revenu et selon certaines caractéristiques du soutien du ménage. Un tableau présente également la répartition de la taille du revenu du ménage en 1980 en dollars constants (1985), d'après le recensement de 1981.

La série "Le Pays" fournit les données pour le Canada, les provinces et les territoires.

DIMENSION SERIES

- Profile of Ethnic Groups (Catalogue No. 93-154)
- Profile of the Immigrant Population (Catalogue No. 93-155)

These dimension publications provide census data on the different characteristics of these special groups. Included are total income size distributions for the population 15 years and over by sex, and the number of employment income recipients along with their average employment income in 1985 by sex and work activity.

Census Metropolitan Areas (Catalogue No. 93-156)

This publication provides data covering a wide range of census variables for the 25 census metropolitan areas (large urban centres) in Canada. Included are income size distributions from the 1981 Census in constant (1985) dollars providing 1980-1985 comparisons for the population 15 years and over and for census families. Also included are tables providing 1985 income size distributions for the population 15 years and over by sex and age groups, 1985 employment income size distributions by sex and work activity in 1985, 1985 household income size distributions by household type as well as a table showing income status of the population in private households by economic family status.

PROFILE SERIES

This series contains a wide range of income statistics as well as information on other census variables. Included are 1985 income size distributions for males and females 15 years and over, census families and private households. Also shown is the percentage composition of total income for the population 15 years and over, average employment income in 1985 by sex and work activity and the income status of economic families, unattached individuals and the population in private households. Data are presented for a variety of subprovincial areas: Census Divisions and Subdivisions (94-101 to 94-124), Federal Electoral Districts (94-125, 94-126, 94-133 and 94-134), Census Metropolitan

SÉRIE: DIMENSIONS

- Profil des groupes ethniques (nº 93-154 au catalogue)
- Profil de la population immigrante (nº 93-155 au catalogue)

Ces publications de la série "Dimensions" renferment des données du recensement sur différentes caractéristiques de ces groupes spéciaux. On y retrouve la répartition de la taille du revenu pour la population de 15 ans et plus selon le sexe, et le nombre de bénéficiaires d'un revenu d'emploi, y compris leur revenu d'emploi moyen en 1985 selon le sexe et le travail.

Régions métropolitaines de recensement (nº 93-156 au catalogue)

Cette publication contient des données sur un vaste éventail de variables pour les 25 régions métropolitaines de recensement (grands centres urbains) du Canada. On y retrouve la répartition de la taille du revenu en dollars constants (1985), d'après le recensement de 1981, permettant des comparaisons entre 1980 et 1985 pour la population de 15 ans et plus et pour les familles de recensement. On y retrouve également des tableaux portant sur la répartition de la taille du revenu en 1985 pour la population de 15 ans et plus selon le sexe et le groupe d'âge, la répartition de la taille de revenu d'emploi en 1985 selon le sexe et le travail en 1985, la répartition de la taille du revenu du ménage en 1985 selon le genre de ménage ainsi qu'un tableau montrant la catégorie de revenu de la population dans les ménages privés selon la situation des particuliers dans la famille économique.

SÉRIE: PROFILS

Cette série contient un vaste éventail de statistiques sur le revenu ainsi que des renseignements sur d'autres variables du recensement. On y retrouve la répartition de la taille du revenu en 1985 pour les hommes et les femmes de 15 ans et plus, les familles de recensement et les ménages privés. On y retrouve également la composition du pourcentage du revenu total de la population de 15 ans et plus, le revenu d'emploi moyen en 1985 selon le sexe et le travail et la catégorie de revenu des familles économiques, des personnes seules et de la population dans les ménages privés. Les données sont présentées pour plusieurs régions infraprovinciales: divisions et subdivisions de

Areas and Census Agglomerations (94-127 and 94-128), Census-tracted Centres (Census Tracts and Component Subdivisions) (95-101 to 95-174), Urban and Rural Areas (94-129 and 94-130) and Labour Force Survey Economic Regions (94-131). Data for profiles are also available in machine-readable form.

recensement (94-101 à 94-124), circonscriptions électorales fédérales (94-125, 94-126, 94-133 et 94-134), régions métropolitaines de recensement et agglomérations de recensement (94-127 et 94-128), centres urbains divisés en secteurs de recensement (secteurs de recensement et subdivisions composantes) (95-101 à 95-174), régions urbaines et rurales (94-129 et 94-130) et régions économiques de l'Enquête sur la population active (94-131). Les données des profils sont également disponibles sous forme lisible par machine.

FOCUS ON CANADA SERIES

93-116

- Family Income (Catalogue No. 98-128)

This study concentrates on an examination of changes in family income between 1980 and 1985 in terms of constant (1985) dollars by selected characteristics such as family structure, life cycle, work activity and major source of income. The composition of various income classes and the sources of total income are briefly analysed. The study highlights the relative position of various regions.

- Employment Income (Catalogue No. 98-129)

This study highlights the major differences in the employment income of various population groups. Classified by sex, average employment income is examined by age, marital status, education, work activity and occupation. Provincial differences are presented briefly. The study also includes a short analysis of changes in employment income between 1980 and 1985.

METROPOLITAN ATLAS SERIES

A series of 12 publications covering Canada's major census metropolitan areas combine maps, graphs and text to present the 1986 Census data in an easy-to-understand format. Included is information on the total income of the population 15 years and over, census family income, household income and the incidence of low income of the population in private households as well as a number of other key demographic, housing, social and economic themes. Maps summarize these

SÉRIE: LE CANADA À L'ÉTUDE

- Le revenu de la famille (nº 98-128 au catalogue)

Cette étude est axée sur l'évolution du revenu de la famille entre 1980 et 1985 (en dollars constants de 1985), selon certaines caractéristiques, telles que la structure de la famille, le cycle de vie, l'activité et la principale source de revenu. La composition des divers classements de revenu et les sources de revenu total sont analysées de façon succincte. L'étude met de plus en parallèle la situation du revenu dans diverses régions.

- Revenu d'emploi (nº 98-129 au catalogue)

Cette étude dégage les principales différences observées au niveau du revenu d'emploi des divers groupes de population. Classé selon le sexe, le revenu d'emploi moyen est examiné selon l'âge, l'état matrimonial, la scolarité, l'activité et la profession. Les différences provinciales sont présentées de façon succincte. L'étude comprend également une courte analyse de l'évolution du revenu d'emploi entre 1980 et 1985.

SÉRIE D'ATLAS MÉTROPOLITAINS

Cette série de 12 publications, portant sur les principales régions métropolitaines de recensement du Canada, réunit des cartes, des graphiques et des textes et présente les données du recensement de 1986 sous une forme facile à comprendre. On y retrouve également des renseignements sur le revenu total de la population de 15 ans et plus, le revenu de la famille de recensement, le revenu du ménage et l'incidence de faible revenu de la population dans les ménages

93-116 93-116

complex statistics and pinpoint areas of concentration, facilitate comparisons and reveal changing patterns - helping us to better understand the cities we live in. Information is included for the following 12 large urban centres:

privés ainsi qu'un nombre de principales questions abordées, qu'elles soient démographiques, sociales ou économiques ou qu'elles touchent au logement. Des cartes présentent de facon synoptique ces statistiques complexes et permettent la délimitation des régions de concentration, facilitent les comparaisons révèlent les tendances changeantes. Les utilisateurs ont ainsi une idée plus précise de leur ville. Ces renseignements sont compris pour les 12 grands centres urbains suivants:

St. John's	(nº 98-101 au catalogue)
Halifax	(nº 98-102 au catalogue)
Québec	(nº 98-103 au catalogue)
Montréal	(nº 98-104 au catalogue)
Ottawa-Hull	(nº 98-105 au catalogue)
Toronto	(nº 98-106 au catalogue)
Hamilton	(nº 98-107 au catalogue)
Winnipeg	(nº 98-108 au catalogue)
Regina	(nº 98-109 au catalogue)
Calgary	(nº 98-110 au catalogue)
Edmonton	(nº 98-111 au catalogue)
Vancouver	(nº 98-112 au catalogue)

BASIC SUMMARY TABLES

This series is designed to meet the needs of users who wish to study the characteristics of small areas. Tables provide information on a variety of census variables. The following income tables are available:

IN86B01	Number, aggregate and average income of population 15 years and over in private households by sex (3) and 1985 income groups (2)

IN86B02	Number, aggregate and average
	income of census families in private
	households

IN86B03	Number, aggregate and average
	income of unattached individuals 15
	years and over in private households
	by sex (3)

IN86B04	Number, aggregate and average
	income of private households

IN86B05	Number, aggregate and average employment income of population 15 years and over who worked in 1985 and reported employment income by
	sex (3)

TABLEAUX SOMMAIRES DE BASE

Cette série est conçue pour répondre aux besoins des utilisateurs qui désirent étudier les caractéristiques des petites régions. Les tableaux donnent des renseignements sur une gamme de variables du recensement. Les tableaux suivants sur le revenu sont disponibles:

IN86B01	Nombre, revenu agrégé et revenu moyen de la population de 15 ans et plus dans les ménages privés selon le sexe (3) et la tranche de revenu en 1985 (2)
IN86B02	Nombre, revenu agrégé et revenu moyen des familles de recensement dans les ménages privés
IN86B03	Nombre, revenu agrégé et revenu moyen des personnes seules de 15 ans et plus dans les ménages privés selon le sexe (3)
IN86B04	Nombre, revenu agrégé et revenu moyen des ménages privés
IN86B05	Nombre, revenu agrégé et revenu moyen d'emploi de la population de 15

selon le sexe (3)

ans et plus ayant travaillé en 1985 et ayant déclaré un revenu d'emploi IN86B06 Number, aggregate and average

income of non-family persons 15 years and over in private households by

sex (3)

IN86B07 Number, aggregate and average

income of economic families in private households

1.1

The tables are produced for the following four geographic levels: (i) enumeration areas and federal electoral districts; (ii) census subdivisions (municipalities) and census divisions (counties); (iii) census tracts and provincial census tracts; (iv) Canada, provinces, territories and census metropolitan areas.

Data for the basic summary tables are available in machine-readable form to facilitate aggregation and manipulation.

AUTRES PRODUITS CONNEXES

- Census Products

OTHER RELATED PRODUCTS

Also available are the following tables for Canada, provinces and territories from the 1981 and 1986 Censuses. Similar tables but limited to data from 1986 are available for census metropolitan areas.

IN86B01A

Population 15 years and over by sex, work activity and 1980 and 1985 employment income groups in constant (1985) dollars, 1981 and 1986 Censuses - 20% sample data

IN86B01B

Census families in private households by 1980 and 1985 family income groups in constant (1985) dollars, showing family structure, 1981 and 1986 Censuses - 20% sample data IN86B06 Nombre, revenu agrégé et revenu

moyen des personnes hors famille de 15 ans et plus dans les ménages privés

selon le sexe (3)

IN86B07 Nombre, revenu agrégé et revenu moyen des familles économiques dans

les ménages privés

Les tableaux sont produits pour les quatre régions géographiques suivantes: (i) secteurs de dénombrement et circonscriptions électorales fédérales; (ii) subdivisions de recensement (municipalités) et divisions de recensement (comtés); (iii) secteurs de recensement et secteurs de recensement provinciaux; (iv) Canada, provinces, territoires et régions métropolitaines de recensement.

Les données des tableaux sommaires de base sont disponibles sous forme lisible par machine pour faciliter l'agrégation et la manipulation des données.

- Produits du recensement

Les tableaux suivants, dont les données sont tirées des recensements de 1981 et 1986, sont également disponibles pour le Canada, les provinces et les territoires. Des tableaux semblables, mais contenant des données de 1986 seulement, sont disponibles pour les régions métropolitaines de recensement.

IN86B01A

Population de 15 ans et plus selon le sexe, le travail et la tranche de revenu d'emploi en 1980 et 1985 en dollars constants (1985), recensements de 1981 et 1986 données-échantillon (20%)

IN86B01B

Familles de recensement dans les ménages privés selon la tranche de revenu de la famille en 1980 et 1985 en dollars constants (1985), par structure de la famille, recensements de 1981 et 1986 - données-échantillon (20%)

IN86B01C

Economic families and unattached individuals in private households by selected characteristics, showing 1980 and 1985 income status, 1981 and 1986 Censuses - 20% sample data

IN86B01C

Familles économiques et personnes seules dans les ménages privés selon certaines caractéristiques, par catégorie de revenu en 1980 et 1985, recensements de 1981 et 1986 - donnéeséchantillon (20%)

IN86B01D

Private households by 1980 and 1985 household income groups in constant (1985) dollars, showing age of household maintainer, 1981 and 1986 Censuses - 20% sample data

IN86B01D

Ménages privés selon la tranche de revenu du ménage en 1980 et 1985 en dollars constants (1985), par âge du soutien du ménage, recensements de 1981 et 1986 - données-échantillon (20%)

- Non-census Products

In addition to the data from the 1986 Census, a series of reports have also been published from the 1986 Survey of Consumer Finances. Although the Survey of Consumer Finances excludes certain segments of the population, its income concept is similar to that of the census. These reports are as follows:

Income Distributions by Size in Canada, annual since 1971, Catalogue No. 13-207

Family Incomes, Census Families, annual since 1971, Catalogue No. 13-208

Earnings of Men and Women, 1986, Catalogue No. 13-217

Household Facilities by Income and Other Characteristics, biennial since 1976, Catalogue No. 13-567

REFERENCE PRODUCTS

Users, who may require assistance in understanding and interpreting the data and geographic concepts appearing in this set of tabulations, should refer to the 1986 Census Dictionary (Catalogue No. 99-101E or F). The Dictionary provides definitions for all variables and terms used in 1986 Census data products.

- Produits non reliés au recensement

En plus des données tirées du recensement de 1986, une série de rapports ont également été publiés à partir de l'Enquête sur les finances des consommateurs. Même si l'Enquête sur les finances des consommateurs ne comprend pas certains segments de la population, son concept sur le revenu est semblable à celui du recensement. Ces rapports sont:

Répartition du revenu au Canada selon la taille du revenu, publication annuelle depuis 1971, no 13-207 au catalogue

Revenus de familles, familles de recensement, publication annuelle depuis 1971, nº 13-208 au catalogue

Gains des hommes et des femmes, 1986, nº 13-217 au catalogue

Équipement ménager selon le revenu et d'autres caractéristiques, publication biennale depuis 1976, no 13-567 au catalogue

PRODUITS DE RÉFÉRENCE

Les utilisateurs qui ont besoin d'aide pour comprendre et interpréter les données et les concepts géographiques figurant dans cette série de totalisations peuvent consulter le Dictionnaire du recensement de 1986 (n° 99-101F ou E au catalogue). Le dictionnaire donne les définitions de toutes les variables et de tous les termes utilisés dans les produits du recensement de 1986.

93-116

Further details on the products and services available from the census are provided in the 1986 Census Products and Services – Final Edition (Catalogue No. 99-103E or F).

All users wishing to obtain more information about the range of census products available to serve their needs are invited to contact their nearest Statistics Canada Regional Office. A representative will be glad to help. Addresses and phone numbers are listed on page xLix.

SYMBOLS

The following standard symbols are used in census publications:

- .. figures not available
- ... figures not appropriate or not applicable
- nil or zero
- amount too small to be expressed
- xxx figures suppressed to protect confidentiality
- ** The median income could not be calculated as it occurred in an open-ended class.
- * Excludes 1986 Census data for one or more incompletely enumerated Indian reserves or Indian settlements. For estimates of the missed population and dwellings, see Special Notes.

D'autres détails sur les produits et services du recensement sont fournis dans les **Produits** et services du recensement de 1986 – Version définitive (nº 99-103F ou E au catalogue).

Les utilisateurs qui désirent obtenir plus de précisions sur la gamme des produits du recensement adaptés à leurs besoins sont invités à communiquer avec le bureau régional de Statistique Canada le plus près. Un représentant sera heureux de vous aider. Les adresses et les numéros de téléphone sont donnés à la page Lxxxi.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications du recensement:

- .. nombres non disponibles
- ... n'ayant pas lieu de figurer
- néant ou zéro
- -- nombres infimes
- xxx nombres supprimés afin de protéger la confidentialité
- ** Il est impossible de calculer la médiane car elle se trouve dans une des classes ouvertes de répartition utilisée pour calculer la médiane.
- Ne comprend pas les données du recensement de 1986 pour une ou plusieurs réserves indiennes ou établissements indiens partiellement dénombrés. Pour une estimation de la population et des logements manquants, voir Notes spéciales.

DEFINITIONS

The definitions of geographic terms and census concepts are presented here in summary form only. Users should refer to the 1986 Census Dictionary (Catalogue No. 99-101E or F) for the full definitions and additional remarks related to these concepts and definitions.

AGE

Refers to the age at last birthday (as of the census reference date, June 3, 1986). This variable is derived from the date of birth question.

AVERAGE EMPLOYMENT INCOME

Average employment income of individuals refers to the weighted mean total employment income of individuals 15 years of age and over who reported employment income for 1985. Average employment income is calculated from unrounded data by dividing the aggregate employment income of a specified group of individuals (e.g., males, 45-54 years of age) by the number of individuals with employment income in that group.

AVERAGE WAGES AND SALARIES

Average wages and salaries refers to the weighted mean wages and salaries of individuals 15 years of age and over who reported wages and salaries for 1985. Average wages and salaries is calculated from unrounded data by dividing the aggregate wages and salaries of a specified group of individuals (e.g., males, 45-54 years of age) by the number of individuals with wages and salaries in that group.

CONSTANT (1985) DOLLARS INCOME

Refers to the presentation of 1980 income statistics in terms of 1985 dollars. To convert the 1980 incomes into 1985 dollars, the 1980 values were revised upwards by the change in the Consumer Price Index between 1980 and 1985.

EMPLOYMENT INCOME

Refers to total income received by persons 15 years of age and over during 1985 as wages and salaries, net income from non-farm self-employment and/or net farm income as defined below.

(a) Wages and Salaries

Refers to gross wages and salaries before deductions for such items as income tax, pensions, unemployment insurance, etc. Included in this source are military pay and allowances, tips, commissions, cash bonuses as well as all types of casual earnings in calendar year 1985. The value of taxable allowances and benefits provided by employers such as free lodging, free automobile use, etc., is excluded.

(b) Net Non-farm Self-employment Income

Refers to net income (gross receipts minus expenses of operation such as wages, rents, depreciation, etc.) received during calendar year 1985 from the respondent's non-farm unincoporated business or professional practice. In the case of a partnership, only the respondent's share was to be reported. Also included is net income from persons babysitting in their own homes, operators of direct distributorships such as selling and delivering cosmetics, as well as from free-lance activities of artists, writers, music teachers, hairdressers, dressmakers, etc.

(c) Net Farm Self-employment Income

Refers to net income (gross receipts from farm sales minus depreciation and cost of operation) received during calendar year 1985 from the operation of a farm, either on own account or in partnership. In the case of partnerships, only the respondent's share of income was to be reported. Also included are advance, supplementary or assistance payments to farmers by federal or provincial governments. However, the value of income "in kind", such as agricultural products produced and consumed on the farm is excluded.

OCCUPATION (BASED ON1980 CLASSIFICATION)

Refers to the kind of work persons were doing during the reference week, as determined by their reporting of their kind of work and the description of the most important duties in their job. If the person did not have a job during the week prior to enumeration, the data relate to the job of longest duration since January 1, 1985. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

PROVINCE

Refers to the major political division of Canada. From a statistical point of view, it is a basic unit for which data are tabulated and cross-classified. In census publications, provincial tables include the Yukon Territory and the Northwest Territories.

SCHOOLING: HIGHEST LEVEL OF

Refers to the highest grade or year of elementary or secondary school attended, or the highest year of university or other non-university completed. University education is considered to be above other non-university. Also, the attainment of a degree, certificate or diploma is considered to be at a higher level than years completed or attended without an educational qualification.

SEX

Refers to the gender of the respondent.

WORK ACTIVITY IN 1985

Refers to the number of weeks which a person worked in 1985 and whether these weeks worked were full time or part time.

SAMPLING AND WEIGHTING

The 1986 Census data were collected either on a 100% basis (i.e. for all households) or on a sample basis (i.e. from only a random sample of households) with data weighted to provide estimates of the entire population. The information in this report was collected on a 20% sample basis and weighted up to compensate for sampling. All table headings are noted accordingly. (Note that, on Indian reserves and in remote areas, all data were collected on a 100% basis. In the Northwest Territories, data were collected on a 100% basis but, for the communities of Fort Smith, Hay River, Pine Point and Yellowknife, the data were processed on a 20% basis.)

For any given geographic area, the weighted population, household, dwelling or family, total or subtotal may differ from that shown in reports containing data collected on a 100% basis. Such variation (in addition to the effect of random rounding) will be due to sampling.

DATA QUALITY

GENERAL

The 1986 Census was a large and complex undertaking and, while considerable effort was taken to ensure high standards throughout all collection and processing operations, the resulting estimates are inevitably subject to a certain degree of error. Users of census data should be aware such error exists, and have some appreciation of its main components, so that they can assess the usefulness of census data for their purposes and the risks involved in basing conclusions or decisions on these data.

Errors can arise at virtually every stage of the census process from the preparation of materials. through the listing of dwellings and data collection to processing. Some errors occur more or less at random, and when the individual responses are aggregated for a sufficiently large group, such errors tend to cancel out. For errors of this nature. the larger the group, the more accurate the corresponding estimate. It is for this reason that users are advised to be cautious when using small estimates. There are some errors, however, which might occur more systematically, and which result in "biased" estimates. Because the bias from such errors is persistent no matter how large the group for which responses are aggregated, and because bias is particularly difficult to measure, systematic errors are a more serious problem for most data users than the random errors referred to previously.

For census data in general, the principal types of error are as follows:

- coverage errors, which occur when dwellings and/or individuals are missed, incorrectly included or double counted;
- non-response errors, which result from the fact that responses cannot be obtained from a small number of households and/or individuals, because of extended absence or some other reason:
- response errors, which occur when the respondent, or sometimes the Census Representative, misunderstands a census question, and records an incorrect response;
- processing errors, which can occur at various steps including: coding, when "write-in" responses are transformed into numerical codes by clerks; data capture, when responses are transferred from the census questionnaire to computer tapes by key-entry operators; and imputation, when a "valid", but not necessarily correct, response is inserted into a record by the computer to replace missing or "invalid" data ("valid" and "invalid" referring to whether or not the response is consistent with other information on the record);

sampling errors, which apply only to the supplementary questions on the "long form" asked of a one-fifth sample of households, and which arise from the fact that the results for these questions, when weighted up to represent the whole population, inevitably differ somewhat from the results which would have been obtained if these questions had been asked of all households.

The above types of error each have both random and systematic components. Usually, however, the systematic component of sampling error is very small in relation to its random component. For the other non-sampling errors, both random and systematic components may be significant.

COVERAGE ERRORS

Coverage errors affect the accuracy of the census counts, that is the sizes of the various census universes: population, families, households and dwellings. While steps have been taken to correct certain identifiable errors, the final counts are still subject to some degree of error resulting from persons or dwellings being missed, incorrectly included in the census or double counted.

Missed dwellings or persons result in undercoverage. Dwellings can be missed because of misunderstanding of enumeration area (EA) boundaries, or because dwellings are hidden or appear uninhabitable. Persons can be missed when their dwelling is missed or classified as vacant, or when individual household members are omitted from the questionnaire because the respondent misinterprets the instructions on whom to include. Some individuals may be missed because they have no usual residence and did not spend census night in any dwelling.

Dwellings or persons that are incorrectly included or double counted result in **overcoverage**. Overcoverage of dwellings can occur when structures unfit for habitation are listed as dwellings, or when units which do not meet the census definition of a dwelling are listed separately, instead of being treated as part of a larger dwelling. Double counting of dwellings can occur, for example, because of ambiguity over EA boundaries. Persons can be double counted because their dwelling is double counted or because the guidelines on whom to include on the questionnaire have been misunderstood. Occasionally, someone who is not a Canadian resident may, incorrectly, be enumerated in the census. On average, overcoverage is

less likely to occur than undercoverage and, as a result, counts of dwellings and persons are likely to be slightly underestimated.

In 1986, four studies were undertaken to measure different aspects of coverage error. First, a sample of dwellings listed as vacant were revisited to verify that they really were vacant on Census Day. Adjustments have been made to the final census counts for households missed because their dwelling was incorrectly classified as vacant. Secondly, a sample of persons enumerated as temporary residents was selected to verify whether or not they were enumerated at their usual place of residence. Based on this sample, estimates were obtained of the number of persons missed because they were temporarily absent from their usual place of residence. Corresponding adjustments were made to the final population counts. Despite these adjustments, the final counts are still subject to some undercoverage. For Canada as a whole and for each province, the magnitude of this residual undercoverage in the 1986 Census is being measured by means of a special study known as the Reverse Record Check. Undercoverage tends to be higher for certain segments of the population such as young adult males and recent immigrants. Undercoverage is offset to some degree by overcoverage errors, and in 1986 for the first time a special study was carried out to investigate overcoverage errors.

OTHER NON-SAMPLING ERRORS

While coverage errors affect the number of units in the various census universes, other errors affect the characteristics of those units.

Sometimes, it is not possible to obtain a complete response from a household, even though the dwelling was identified as occupied and a questionnaire dropped off. The household members may have been away throughout the census period or, in rare instances, the householder may have refused to complete the form. More frequently, the questionnaire is returned but information is missing for some questions or individuals. Considerable effort is devoted to ensuring as complete a response as possible. Census Representatives edit the questionnaires and follow up any missing information. The Census Representative's work is then checked by both a supervisor and a quality control technician. Despite this, at the end of the collection stage, a small number of responses are missing. Although missing entries are eliminated during processing, there remains some potential non-response error. This is particularly serious if the non-respondents differ in some respects from

the respondents since, as described in a later paragraph, a missing value is replaced by the corresponding entry for a "similar" record. If respondents and non-respondents differ in terms of the characteristics involved, this procedure will result in non-response bias.

Even when a response is obtained, it may not be entirely accurate. The respondent may have misinterpreted the question or may have guessed the answer, especially when answering on behalf of another, possibly absent, household member. Such errors are referred to as response errors. While response errors usually arise from inaccurate information provided by respondents, they can also result from mistakes by the Census Representative when completing certain parts of the questionnaire such as structural type of dwelling, or when calling back to obtain a missing response.

Some of the questions on the census document require a verbal response to be written in. During regional processing, these "write-in" entries are given a numeric code. <u>Coding errors</u> can occur, especially when the code list is extensive (as with, for example, language, ethnic origin, industry and occupation), and when the written response is ambiguous, incomplete or difficult to read. Coding errors are controlled, though not completely eliminated, by verifying a sample of each coder's work and taking corrective action where necessary.

After the coding and certain other manual processing steps are complete, the information on the questionnaires is key-entered onto a computer file. Two procedures are used to control the number of <u>data capture errors</u>. First, certain edits (such as range checks) are performed as the data are keyed. Secondly, a sample from each batch of documents is re-keyed and compared with the original entries. If there is more than a specified number of errors among the original entries, the whole batch is re-keyed.

Once the data have been captured, they are sent to Ottawa where they undergo a series of computer checks to identify missing or inconsistent responses. In the case of inconsistent responses, it has first to be decided which response is to be considered invalid. Invalid or missing responses must then be replaced by valid responses, that is, responses which are consistent with other data on the record. For a small proportion of cases, the correct response can be inferred from other data on the record. In most cases, however, this is not possible and a valid response is obtained from a "donor" record selected at random from among a group of consistent records which are similar to the invalid record in terms of a number of related

characteristics. There is, of course, no guarantee that the imputed value will necessarily be the correct response for the individual concerned. However, provided the missing or invalid records are similar, on average, to the valid records, any imputation errors will more or less cancel out when results are tabulated for a sufficiently large geographical area or subgroup of the population.

Various studies are being carried out to evaluate the quality of the responses obtained in the 1986 Census. For each question, response rates and edit failure rates have been calculated. These can be useful in identifying the potential for non-response and other errors. Also, tabulations from the 1986 Census have been or will be compared with corresponding estimates from previous censuses, from sample surveys (such as the Labour Force Survey) and from various administrative records (such as birth registrations and municipal assessment records). Such comparisons can indicate potential quality problems or at least discrepancies between the sources.

In addition to these aggregate-level comparisons, there are some micromatch studies in progress, in which census responses are compared with another source of information at the individual record level. For certain "stable" characteristics (such as age, sex, mother tongue, place of birth, etc.), the responses obtained in the 1986 Census, for a sample of individuals, are being compared with those for the same individuals in the 1981 Census. Also, following the 1986 Census, a sample of persons was re-enumerated, primarily to determine overcoverage rates. At the same time. however, interviewers asked a series of detailed questions on language, ethnic origin and structural type of dwelling, the responses to which will be compared with the corresponding census responses in order to identify, and hopefully understand, response errors.

SAMPLING ERRORS

Estimates obtained by weighting up responses collected on a sample basis are subject to error due to the fact that the distribution of characteristics within the sample will not usually be identical to the distribution of characteristics within the population from which the sample has been selected.

The potential error introduced by sampling will vary according to the relative scarcity of the characteristics in the population. For large cell values the potential error due to sampling, as a proportion of the cell value, will be relatively small. For small cell values this potential error, as a proportion of the cell value, will be relatively large.

The potential error due to sampling is usually expressed in terms of the so called "standard error". This is the square root of the average, taken over all possible samples of the same size and design, of the squared deviation of the sample estimate from the value for the total population.

The table below provides approximate measures of the standard error due to sampling. These measures are intended as a general guide only.

Users wishing to determine the approximate error due to sampling for any given cell of data, based upon the 20% sample, should choose the standard error value in the column of the standard error table whose heading is closest to the value of the given cell in the census tabulation. When using the obtained standard error value, in general the user can be reasonably certain that, for the enumerated population, the true value (discounting all forms of error other than sampling) lies within plus or minus three times the standard error (e.g., for a cell value of 1,000 the range would be 1,000 + or - 3X65 or 1,000 + or - 195).

The standard errors given in the table below will not apply to population or universe (persons, households, dwellings or families) totals or subtotals for the geographic area under consideration (see Sampling and Weighting). The effect of sampling for these cells can be determined by comparison with a corresponding 100% publication.

The effect of the particular sample design and weighting procedure used in the 1986 Census will vary, however, from one characteristic to another and from one geographic area to another. The standard error values in the table below may, therefore, understate or overstate the error due to sampling.

For further information on the quality of census data, contact Social Survey Methods Division at Statistics Canada, Ottawa, Canada K1A 0T6 (613) 951-6929.

CONFIDENTIALITY AND RANDOM ROUNDING

The figures shown in this report have been subjected to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with any identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of "5". This technique provides strong protection against direct, residual or negative disclosures without adding significant error to the census data. However, since totals are independently rounded, they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census tabulations. Similarly, percentages, which are calculated on figures, do not necessarily add to 100. Percentage distributions and rates for the most part are based on rounded data, while percentage changes and averages are based on unrounded data.

Of concern to some users is that small cell counts may suffer a significant distortion as a result of random rounding. This distortion is the protection against disclosure and individual data cells containing these small numbers may lose their precision as a result. Since the rounding is of a random nature, however, when data cells are reaggregated by the user, the rounding errors tend to cancel out. Distortions may be further reduced by building in the appropriate subtotals into tabulations. Also available is the option of requesting custom tabulations from the census microdata bases. With custom products, random rounding occurs after data cells have been aggregated thus minimizing any distortion.

In addition to random rounding, procedures such as area and cell suppression have been adopted to further protect the confidentiality of individual responses.

Table: Approximate Standard Error Due to Sampling for 1986 Census Sample Data

Cell Value												
Approximate	50	100	200	500	1,000	2,000	5,000	10,000	20,000	50,000	100,000	500,000
Standard Error	15	20	30	45	65	90	140	200	280	435	600	1,300

With area suppression, all characteristic data for the geographic area are deleted and replaced with the symbol (XXX). The extent to which data are suppressed depends upon whether the area is a standard geographic area, i.e. aggregated from enumeration areas (federal electoral districts, census divisions, census subdivisions, census tracts, etc.) or a non-standard area specified by the user for a custom tabulation. Data are deleted if the population is less than 40 persons for standard areas and less than 100 persons for non-standard areas. For tables involving income distributions, the suppression of data is extended to geographic areas with a total population of less than 250. Suppressed data are, however, included in the appropriate higher aggregate subtotals and totals. This technique is being implemented for all products involving subprovincial data (i.e. Profile series, basic summary data products, semi-custom and custom data products) collected on a 100% or 20% sample basis.

Note: For data collected on a 20% sample basis, area suppression is based on the non-institutional population rather than the total population since sample data were not collected for the institutional population.

With cell suppression, the minimum acceptable value for a cell is specified. All cell values below the designated cut-off are deleted and replaced by the symbol (XXX). However, the suppressed data are included in the appropriate higher aggregate subtotals and totals. For 1986 data products, two different methods of cell suppression are being implemented. For publications in "The Nation" and "Dimensions" series involving income, detailed occupation or detailed industry, the distribution is being suppressed where less than 250 persons or units are involved. In semi-custom and custom tabulations of variables collected on a sample basis, all cells with a value of "5" (after random rounding) are being suppressed.

SPECIAL NOTES

POPULATION COUNTS BASED ON USUAL RESIDENCE

The population counts shown here for a particular area represent the number of Canadians whose usual place of residence is in that area, regardless of where they happened to be on Census Day. Also included are any Canadians staying in a dwelling in that area on Census Day and having no usual place of residence elsewhere in Canada. In most areas, there is little difference between the number

of usual residents and the number of people staying in the area on Census Day. For certain places, however, such as tourist or vacation areas, or those including large work camps, the number of people staying in the area at any particular time could significantly exceed the number of usual residents shown here.

INCOMPLETELY ENUMERATED INDIAN RESERVES AND INDIAN SETTLEMENTS

On some Indian reserves and Indian settlements in the 1986 Census, enumeration was not permitted or was interrupted before it could be completed.

Data for 1986 are therefore not available for the incompletely enumerated reserves and settlements and are not included in tabulations. Data for geographic areas containing one or more of these reserves or settlements are therefore noted accordingly. Because of the missing data, users are cautioned that for affected geographic areas, comparisons (e.g., percentage change) between 1981 and 1986 are not exact. While for higher level geographic areas (Canada, provinces, census metropolitan areas and census agglomerations) the impact of the missing data is very small, the impact can increase for smaller areas containing a larger proportion of affected reserves and settlements.

While it is not possible to estimate the population of each incompletely enumerated reserve, estimates of the missed total population and total occupied dwellings at the provincial level have been made and are shown in Appendix 1.

Note, however, that it was not possible to estimate any characteristics of the missed population, even at the provincial level.

Additional information on this subject can be obtained by referring to the User Information Bulletin, Number 1, "Summary of the Methodology for Estimating the Population and Occupied Private Dwellings on Incompletely Enumerated Indian Reserves".

OCCUPATION

The following minor data quality problems should be taken into consideration when using this publication. Tailors and dressmakers (8553) and sewing machine operators (8563): In minor group 855-856, Occupations associated with textile, fur and leather products, there is confusion in the coding of tailors and dressmakers (8553) and sewing machine operators (8563), particularly in the province of Quebec. Consequently, tailors and dressmakers estimates are high at the expense of the machine operators in this province.

Farm workers (7183, 7185, 7199): Data for farm workers should be used with caution. The reference period for the census was the last week of May, 1986. Farmers and farm workers, whether livestock, crop or a combination of these, will be primarily occupied at this period of time in seeding, planting or otherwise working the land. The principal activities reported on the census qestionnaires may imply, therefore, that these people are crop farm workers. Crop farm workers (7185) may consequently be overstated at the expense of livestock workers (7183) and other farming, horticultural and animal husbandry occupations, n.e.c. (7199).

Farmers (711): Data for farmers, minor group (711), are a grouping of livestock farmers (7113), crop farmers (7115) and farmers, n.e.c. (7119). The quality of the data for these unit groups was considered poorer than that for farm workers and, consequently, the codes were collapsed.

General managers and other senior officials (1130): The unit group "General managers and other senior officials (1130)" should not be interpreted as being exclusively senior managers or corporate managers. These people are coded to this category but other respondents who consider themselves general managers have also been assigned this code. The term "manager" is used more and more frequently in the labour market and persons having this "title" may have a variety of responsabilities. These people respond to the census questionnaire in a general way because the nature of their work is varied. It is suggested that employment income data be used in conjunction with that for occupation as an indicator of senior management.

COMPARABILITY BETWEEN 1981 AND 1986 CENSUS INCOME DATA

The total income concept used in the 1986 Census differs slightly from that used in 1981. The 1986 Census includes, for the first time, federal child tax credits in total money income. In 1986, as in 1981, individual income statistics exclude institutional residents while family and household income statistics are restricted to private households.

RELATIONSHIP OF INCOME ESTIMATES TO THE NATIONAL ACCOUNTS AND SURVEY OF CONSUMER FINANCES

An evaluation of census income estimates against personal income estimates in the national accounts was carried out. After adjustments to the personal income estimates for concepts and coverage, it was found that overall census estimates of aggregate income in 1985 are just over 90% of similar national accounts estimates. Census estimates for some income components compare more favourably than others. Employment income estimates in the census are 98% of comparable national accounts estimates. Census estimates of old age security pensions and family allowances are also close to similar national accounts estimates but census estimates of other government transfer payments and investment income appear to be underestimated to a larger degree.

Census income statistics were also compared with similar statistics from the annual Survey of Consumer Finances. On the whole, results were quite satisfactory. The observed differences between the two sources of income data were ascribed primarily to estimation errors and differences in universe coverage.

APPENDIX 2: 1980 OCCUPATIONAL CLASSIFICATION

LIST OF MAJOR GROUPS, MINOR GROUPS AND UNIT GROUPS

MAJOR GROUP 11 - MANAGERIAL, ADMINISTRATIVE AND RELATED OCCUPATIONS

111 Officials and administrators unique to government

1111	Members	of legis	lative	bodies
------	---------	----------	--------	--------

- 1113 Government administrators
- 1115 Post office management occupations
- 1116 Inspectors and regulatory officers, government
- 1119 Officials and administrators unique to government, n.e.c.

113/114 Other managers and administrators

- 1130 General managers and other senior officials
- 1131 Management occupations, natural sciences and engineering
- 1132 Management occupations, social sciences and related fields
- 1133 Administrators in teaching and related
- 1134 Administrators in medicine and health
- 1135 Financial management occupations
- 1136 Personnel and industrial relations management occupations
- 1137 Sales and advertising management occupations
- 1141 Purchasing management occupations
- 1142 Services management occupations
- 1143 Production management occupations
- 1145 Management occupations, construction operations
- 1146 Farm management occupations
- 1147 Management occupations, transport and communications operations
- 1149 (1151-1158) Other managers and administrators, n.e.c. (in the following industries):
 - 1151 Mines (including milling), quarries and oil wells
 - 1152 Durable goods manufacturing(1)
 - 1153 Non-durable goods manufacturing(2)
 - 1154 Construction
 - 1155 Transportation, communication and other utilities
 - 1156 Trade
 - 1157 Community, business and personal service industries
 - 1158 Other industries and unspecified(3)

117 Occupations related to management and administration

- 1171 Accountants, auditors and other financial officers
- 1173 Organization and methods analysts
- 1174 Personnel and related officers
- 1175 Purchasing officers and buyers. except wholesale and retail trade
- 1176 Inspectors and regulatory officers, n.e.c.
- 1179 Occupations related to management and administration, n.e.c.

MAJOR GROUP 21 - OCCUPATIONS IN NATURAL SCIENCES, ENGINEERING AND MATHEMATICS

211 Occupations in physical sciences

- 2111 Chemists
- 2112 Geologists
- 2113 Physicists
- 2114 Meteorologists
- 2117 Physical sciences technologists and technicians
- 2119 Occupations in physical sciences,

213 Occupations in life sciences

- 2131 Agriculturists and related scientists
- 2133 Biologists and related scientists
- 2135 Life sciences technologists and technicians
- 2139 Occupations in life sciences, n.e.c.

214/215 Architects, engineers and community planners

- 2141 Architects
- 2142 Chemical engineers
- 2143 Civil engineers
- 2144 Electrical engineers
- 2145 Industrial engineers
- 2146 Agricultural engineers2147 Mechanical engineers
- 2151 Metallurgical engineers
- 2153 Mining engineers
- 2154 Petroleum engineers
- 2155 Aerospace engineers
- 2156 Nuclear engineers
- 2157 Community planners
- 2159 Professional engineers, n.e.c.

MAJOR GROUP 31 - OCCUPATIONS IN MEDICINE AND HEALTH

311 Health diagnosing and treating occupations

- 3111 Physicians and surgeons
- 3113 Dentists
- 3115 Veterinarians
- 3117 Osteopaths and chiropractors
- 3119 Health diagnosing and treating occupations, n.e.c.

313 Nursing, therapy and related assisting occupations

- 3130 Supervisors: nursing, therapy and related assisting occupations
- 3131 Nurses, registered, graduate and nurses-in-training
- 3132 Orderlies
- 3134 Registered nursing assistants
- 3135 Nursing attendants
- 3136 Audio and speech therapists
- 3137 Physiotherapists
- 3138 Occupational therapists
- 3139 Nursing, therapy and related assisting occupations, n.e.c.

315/316 Other occupations in medicine and health

- 3151 Pharmacists
- 3152 Dietitians and nutritionists
- 3153 Optometrists
- 3154 Dispensing opticians

- 3155 Radiological technologists and technicians
- 3156 Medical laboratory technologists and technicians
- 3157 Denturists
- 3158 Dental hygienists and dental assistants
- 3161 Dental laboratory technicians
- 3162 Respiratory technicians
- 3169 Other occupations in medicine and health, n.e.c.

MAJOR GROUP 33 - ARTISTIC, LITERARY, RECREATIONAL AND RELATED OCCUPATIONS

Occupations in fine and commercial art, photography and related fields

- 3311 Painters, sculptors and related artists
- 3313 Product and interior designers
- 3314 Advertising and illustrating artists
- 3315 Photographers and camera operators
- 3319 Occupations in fine and commercial art, photography and related fields, n.e.c.

333 Occupations in performing and audio-visual arts

- 3330 Producers and directors, performing and audio-visual arts
- 3331 Conductors, composers and arrangers
- 3332 Musicians and singers
- 3333 Occupations related to music and musical entertainment, n.e.c.
- 3334 Dancers and choreographers
- 3335 Actors/actresses
- 3337 Radio and television announcers
- 3339 Occupations in performing and audiovisual arts, n.e.c.

335 Occupations in writing

- 3351 Writers and editors
- 3355 Translators and interpreters
- 3359 Occupations in writing, n.e.c.

336/337 Occupations in sports and recreation

- 3360 Supervisors: occupations in sports and recreation
- 3370 Coaches, trainers and instructors, sports and recreation
- 3371 Referees and related officials
- 3373 Athletes
- 3375 Attendants, sports and recreation
- 3379 Occupations in sports and recreation, n.e.c.

1980

LIST OF MAJOR GROUPS, MINOR GROUPS AND UNIT GROUPS

MAJOR GROUP 41 - CLERICAL AND RELATED OCCUPATIONS

411 Stenographic and typing occupations

- 4110 Supervisors: stenographic and typing occupations
- 4111 Secretaries and stenographers
- 4113 Typists and clerk-typists

413 Bookkeeping, account-recording and related occupations

- 4130 Supervisors: bookkeeping, accountrecording and related occupations
- 4131 Bookkeepers and accounting clerks
- 4133 Cashiers and tellers
- 4135 Insurance, bank and other finance clerks
- 4137 Statistical clerks
- 4139 Bookkeeping, account-recording and related occupations, n.e.c.

414 Office machine and electronic dataprocessing equipment operators

- 4140 Supervisors: office machine and electronic data-processing equipment operators
- 4141 Office machine operators
- 4143 Electronic data-processing equipment operators

415 Material recording, scheduling and distributing occupations

- 4150 Supervisors: material recording, scheduling and distributing occupations
- 4151 Production clerks
- 4153 Shipping and receiving clerks
- 4155 Stock clerks and related occupations
- 4157 Weighers
- 4159 Material recording, scheduling and distributing occupations, n.e.c.

416 Library, file and correspondence clerks and related occupations

4160 Supervisors: library, file and correspondence clerks and related occupations

- 4161 Library and file clerks
- 4169 Library, file and correspondence clerks and related occupations, n.e.c.

417 Reception, information, mail and message distribution occupations

- 4170 Supervisors: reception, information, mail and message distribution occupations
- 4171 Receptionists and information clerks
- 4172 Mail carriers
- 4173 Mail and postal clerks
- 4175 Telephone operators
- 4177 Messengers
- 4179 Reception, information, mail and message distribution occupations, n.e.c.

419 Other clerical and related occupations

- 4190 Supervisors: other clerical and related occupations, n.e.c.
- 4191 Collectors
- 4192 Claim adjusters
- 4193 Travel clerks, ticket, station and freight agents
- 4194 Hotel clerks
- 4195 Personnel clerks
- 4197 General office clerks
- 4199 Other clerical and related occupations, n.e.c.

MAJOR GROUP 51 - SALES OCCUPATIONS

513/514 Sales occupations, commodities

- 5130 Supervisors: sales occupations, commodities
- 5131 Technical sales occupations and related advisers
- 5133 Commercial travellers
- 5135 Sales clerks and salespersons, commodities, n.e.c.
- 5141 Street vendors and door-to-door sales occupations
- 5143 Newspaper carriers and vendors
- 5145 Service station attendants

1980

LIST OF MAJOR GROUPS, MINOR GROUPS AND UNIT GROUPS

5149	Sales	occupations:	commodities,	n.e.c.
------	-------	--------------	--------------	--------

517 Sales occupations, services

- 5170 Supervisors: sales occupations, services
- 5171 Insurance sales occupations
- 5172 Real estate sales occupations
- 5173 Sales agents and traders, securities
- 5174 Advertising sales occupations
- 5177 Business services sales occupations
- 5179 Sales occupations: services, n.e.c.

519 Other sales occupations

- 5190 Supervisors: other sales occupations
- 5191 Buyers, wholesale and retail trade
- 5193 Route drivers
- 5199 Other sales occupations, n.e.c.

MAJOR GROUP 61 - SERVICE OCCUPATIONS

611 Protective service occupations

- 6111 Fire-fighting occupations
- 6112 Police officers and detectives, government
- 6113 Police agents and investigators, private
- 6115 Guards and related security occupations
- 6116 Commissioned officers, Armed Forces
- 6117 Other ranks, Armed Forces
- 6119 Protective service occupations, n.e.c.

612 Food and beverage preparation and related service occupations

- 6120 Supervisors: food and beverage preparation and related service occupations
- 6121 Chefs and cooks
- 6123 Bartenders
- 6125 Food and beverage serving occupations
- 6129 Food and beverage preparation and related service occupations, n.e.c.

613 Occupations in lodging and other accommodation

- 6130 Supervisors: occupations in lodging and other accommodation
- 6133 Lodging cleaners, except private household
- 6135 Sleeping-car and baggage porters
- 6139 Occupations in lodging and other accommodation, n.e.c.

614 Personal service occupations

- 6141 Funeral directors, embalmers and related occupations
- 6142 Housekeepers, servants and related occupations
- 6143 Barbers, hairdressers and related occupations
- 6144 Guides
- 6145 Travel and related attendants, except food and beverage
- 6147 Child-care occupations
- 6149 Personal service occupations, n.e.c.

616 Apparel and furnishings service occupations

- 6160 Supervisors: apparel and furnishings service occupations
- 6162 Laundering and dry cleaning occupations
- 6165 Pressing occupations
- 6169 Apparel and furnishings service occupations, n.e.c.

619 Other service occupations

- 6190 Supervisors: other service occupations
- 6191 Janitors, charworkers and cleaners
- 6193 Elevator-operating occupations
- 6198 Occupations in labouring and other elemental work: other services
- 6199 Other service occupations, n.e.c.

MAJOR GROUP 71 - FARMING, HORTICUL-TURAL AND ANIMAL HUSBANDRY OCCUPATIONS

711 Farmers

- 7113 Livestock farmers
- 7115 Crop farmers
- 7119 Farmers, n.e.c.

1980

LIST OF MAJOR GROUPS, MINOR GROUPS AND UNIT GROUPS

718/719 Other farming, horticultural and animal husbandry occupations

- 7180 Foremen/women: other farming, horticultural and animal husbandry occupations
- 7183 Livestock farm workers
- 7185 Crop farm workers
- 7195 Nursery and related workers
- 7196 Inspecting, testing, grading and sampling occupations: other farming, horticultural and animal husbandry
- 7197 Farm machinery operators
- 7199 Other farming, horticultural and animal husbandry occupations, n.e.c.

MAJOR GROUP 73 - FISHING, TRAPPING AND RELATED OCCUPATIONS

731 Fishing, trapping and related occupations

- 7311 Captains and other officers, fishing vessels
- 7313 Net, trap and line fishing occupations
- 7315 Trapping and related occupations
- 7319 Fishing, trapping and related occupations, n.e.c.

7519 Forestry and logging occupations, n.e.c.

MAJOR GROUP 77 - MINING AND QUARRYING INCLUDING OIL AND GAS FIELD OCCUPATIONS

771 Mining and quarrying including oil and gas field occupations

- 7710 Foremen/women: mining and quarrying including oil and gas field occupations
- 7711 Rotary well-drilling and related occupations
- 7713 Rock and soil drilling occupations
- 7715 Blasting occupations
- 7717 Mining and quarrying: cutting, handling and loading occupations
- 7718 Occupations in labouring and other elemental work: mining and quarrying including oil and gas fields
- 7719 Mining and quarrying including oil and gas field occupations, n.e.c.

811 Mineral ore tr MAJOR GROUP 75 - FORESTRY AND

751 Forestry and logging occupations

LOGGING OCCUPATIONS

- 7510 Foremen/women: forestry and logging occupations
- 7511 Forestry conservation occupations
- 7513 Timber cutting and related occupations
- 7516 Log inspecting, grading, scaling and related occupations
- 7517 Log hoisting, sorting, moving and related occupations
- 7518 Occupations in labouring and other elemental work: forestry and logging

MAJOR GROUP 81/82 - PROCESSING OCCUPATIONS

11 Mineral ore treating occupations

- 8110 Foremen/women: mineral ore treating occupations
- 8111 Crushing and grinding occupations, mineral ores
- 8113 Mixing, separating, filtering and related occupations, mineral ores
- 8115 Melting and roasting occupations, mineral ores
- 8116 Inspecting, testing, grading and sampling occupations: mineral ore treating
- 8118 Occupations in labouring and other elemental work: mineral ore treating
- 8119 Mineral ore treating occupations, n.e.c.

LIST OF MAJOR GROUPS, MINOR GROUPS AND UNIT GROUPS

959 Other crafts and equipment operating occupations, n.e.c.

- 9590 Foremen/women: other crafts and equipment operating occupations, n.e.c.
- 9591 Photographic processing occupations 9599 Other crafts and equipment operating occupations, n.e.c.

MAJOR GROUP 99 - OCCUPATIONS NOT ELSEWHERE CLASSIFIED

991 Occupations not elsewhere classified

- 9910 Supervisors and foremen/women, n.e.c.
- 9916 Inspecting, testing, grading and sampling occupations, n.e.c.
- 9918 (9921-9926) Occupations in labouring and other elemental work, n.e.c. (in the following industries):
 - 9921 Manufacturing industries
 - 9922 Transportation, communication and other utilities
 - 9923 Trade
 - 9924 Community, business and personal service
 - 9925 Public administration and defence
- 9926 Other industries and unspecified(4)
- 9919 Other occupations, n.e.c.

OCCUPATIONAL CLASSIFICATION

1980

LIST OF MAJOR GROUPS, MINOR GROUPS AND UNIT GROUPS

FOOTNOTES

- (1) Includes wood industries, furniture and fixture industries, primary metal industries, metal fabricating industries (except machinery and transportation equipment industries), machinery industries (except electrical machinery), transportation equipment industries, electrical products industries and non-metallic mineral products industries.
- (2) Includes food and beverage industries, tobacco products industries, rubber and plastics products industries, leather industries, textile industries, knitting mills, clothing industries, paper and allied industries, printing, publishing and allied industries, petroleum and coal products industries, chemical and chemical products industries, and miscellaneous manufacturing industries.
- (3) Includes industry unspecified or undefined, agriculture, forestry, fishing and trapping, finance, insurance and real estate and public administration and defence.
- (4) Includes industry unspecified or undefined, agriculture, forestry, fishing and trapping, mines (including milling), quarries and oil wells, construction industry and finance, insurance and real estate.

n.e.c. = not elsewhere classified.

ACCESSIBLE FROM COAST TO COAST

Statistics Canada's regional reference centres provide a full range of the census products and services. Each reference centre is equipped with a library and a sales counter where users can consult or purchase census publications, microcomputer diskettes, microfiche, maps and more. Each centre has facilities to retrieve information from Statistics Canada's computerized data retrieval systems – CANSIM and TELICHART. A telephone inquiry service is also available with toll-free numbers for regional clients outside local calling areas. Many other services - from seminars to consultations - are offered. Call or write your regional reference centre for information. For a brief description of the products and services available from the 1986 Census, consult the section on Guidelines for Using This Publication.

DOCUMENTS DE RÉFÉRENCE EN FRANÇAIS

		,

DÉFINITIONS

Seul un résumé des définitions des termes géographiques et des concepts du recensement est présenté ici. Les utilisateurs doivent consulter le **Dictionnaire du recensement de 1986** (nº 99-101F ou E au catalogue) pour les définitions complètes et les observations additionnelles pertinentes.

ÂGE

Âge au dernier anniversaire de naissance (à la date de référence du recensement, le 3 juin 1986). Cette variable est établie d'après la réponse à la question sur la date de naissance.

PROFESSION (SELON LA CLASSIFICATION DE 1980)

Genre de travail que faisaient les personnes pendant la semaine de référence. Le genre de travail exécuté est défini à partir du type d'emploi déclaré par le recensé et de la description des tâches les plus importantes qui s'y rattachent. Si le recensé n'avait pas d'emploi au cours de la semaine précédant le recensement, les données portent sur l'emploi qu'il/elle a occupé le plus longtemps depuis le 1er janvier 1985. Les personnes qui avaient deux emplois ou plus devaient donner des renseignements sur l'emploi auquel elles avaient consacré le plus d'heures de travail.

PROVINCE

Principale division politique du Canada. Du point de vue statistique, c'est une unité de base pour laquelle toutes les données sont totalisées et recoupées. Dans les publications du recensement, les tableaux relatifs aux provinces comprennent le Yukon et les Territoires du Nord-Ouest.

REVENU D'EMPLOI

Revenu total reçu en 1985 par les personnes de 15 ans et plus sous forme de rémunération, de revenu net provenant d'un travail autonome non agricole et (ou) de revenu net agricole.

a) Salaires et traitements

Salaires et traitements bruts avant les retenues pour l'impôt sur le revenu, les pensions, l'assurance-chômage, etc. Sont compris la solde et les indemnités militaires, les pourboires, les commissions, les gratifications et aussi les gains provenant de tout genre d'emploi occasionnel réalisés durant l'année civile 1985. Est exclue la valeur des allocations et avantages imposables fournis gratuitement par l'employeur tels que le logement ou l'utilisation d'un véhicule automobile, etc.

b) Revenu net provenant d'un travail autonome non agricole

Revenu net (recettes brutes moins les dépenses d'exploitation, telles que les salaires, les loyers, l'amortissement, etc.), provenant de l'exploitation d'une entreprise non agricole non constituée en société ou de l'exercice d'une profession pour son propre compte, durant l'année civile 1985. Dans le cas d'une association, le recensé devait déclarer seulement sa propre part du revenu. Sont inclus le revenu net des personnes qui gardent des enfants à leur propre domicile, celui des exploitants d'entreprises de distribution directe, par exemple, pour la vente et la livraison de produits de beauté ainsi que celui des activités autonomes des artistes, des écrivains, des professeurs de musique, des coiffeurs (coiffeuses), des couturiers(ères).

c) Revenu net provenant d'un travail autonome agricole

Revenu net (recettes brutes provenant de la vente de produits agricoles, moins l'amortissement et les frais d'exploitation) tiré de l'exploitation d'une ferme, pour son propre compte ou en association, durant l'année civile 1985. Dans le cas d'une association, le recensé devait déclarer seulement sa propre part du revenu. Sont inclus dans le revenu net les subventions, les paiements supplémentaires ou les avances aux agriculteurs accordés par les administrations fédérale et provinciales. Par contre, la valeur du revenu en nature, comme les produits agricoles produits et consommés à la ferme, n'est pas incluse.

REVENU EN DOLLARS CONSTANTS (1985)

Il s'agit des statistiques sur le revenu de 1980 exprimées en dollars de 1985. Pour convertir les revenus de 1980 en dollars de 1985, on a augmenté les valeurs de 1980 selon les modifications de l'Indice des prix à la consommation entre 1980 et 1985.

REVENU MOYEN D'EMPLOI

Revenu total moyen de l'emploi pondéré des personnes de 15 ans et plus qui ont déclaré un revenu d'emploi en 1985. Pour établir le revenu moyen d'emploi à partir de données non arrondies, on divise le revenu agrégé d'emploi d'un groupe de personnes (par ex., hommes de 45 à 54 ans) par le nombre de personnes dans ce groupe qui touchent un revenu d'emploi.

SALAIRES ET TRAITEMENTS MOYENS

Salaires et traitements moyens de l'emploi pondéré des personnes de 15 ans et plus qui ont déclaré avoir reçu une rémunération en 1985. Pour établir le salaire et le traitement moyen à partir de données non arrondies, on divise la rémunération agrégée d'un groupe de personnes (par ex., hommes de 45 à 54 ans) par le nombre de personnes dans ce groupe qui touchent un salaire ou un traitement.

SCOLARITÉ: PLUS HAUT NIVEAU ATTEINT

Dernière année d'études terminée ou non au niveau primaire et secondaire, ou dernière année universitaire ou non universitaire terminée. Dans la hiérarchie de la scolarité, les études universitaires sont classées au-dessus de la catégorie "autres études non universitaires". En outre, la personne qui a obtenu un grade, certificat ou diplôme se trouve classée à un échelon audessus de celle qui a un nombre d'années de scolarité plus élevé, terminées ou non, mais qui n'a pas de titre scolaire.

SEXE

Qualité d'homme ou de femme.

TRAVAIL EN 1985

Indique le nombre de semaines au cours desquelles les personnes ont travaillé, en 1985, à plein temps ou à temps partiel.

ÉCHANTILLONNAGE ET PONDÉRATION

Les données du recensement de 1986 ont été recueillies sur une base de 100% (c'est-à-dire auprès de tous les ménages) ou par un échantillonnage aléatoire des ménages; ces données sont pondérées afin de fournir des estimations sur

l'ensemble de la population. Les renseignements figurant dans le présent bulletin ont été recueillis auprès d'un échantillon de 20% et pondérés afin de compenser l'effet de l'échantillonnage. Tous les titres des tableaux ont été annotés en conséquence. (Veuillez remarquer que, dans les réserves indiennes et les régions éloignées, toutes les données ont été recueillies auprès de toute la population. Dans les Territoires du Nord-Ouest, les données ont été recueillies auprès de toute la population mais, pour les collectivités de Fort Smith, Hay River, Pine Point et Yellowknife, seulement 20% des données ont été traitées.)

Quelle que soit la région géographique, le total ou total partiel pondéré de la population, des ménages, des logements ou des familles peut différer de celui qui figure dans les bulletins de données intégrales. Cet écart (outre l'effet de l'arrondissement aléatoire) sera attribuable à l'échantillonnage.

QUALITÉ DES DONNÉES

GÉNÉRALITÉS

Le recensement de 1986 a été un projet complexe de grande envergure. Même si l'on a déployé des efforts considérables pour maintenir des normes élevées tout au cours des activités de collecte et de traitement, les estimations obtenues sont inévitablement entachées d'erreurs. Les utilisateurs doivent savoir que ces erreurs existent et avoir une idée générale des principales composantes du recensement afin d'être en mesure de déterminer si les données du recensement peuvent leur être utiles et évaluer les risques que comporte le fait de baser leurs conclusions ou leurs décisions sur ces données.

Des erreurs peuvent se produire pratiquement à toutes les étapes du recensement, allant de la préparation des documents au traitement des données, en passant par l'établissement des listes des logements et la collecte des données. Certaines erreurs peuvent survenir plus ou moins au hasard et, lorsque les différentes réponses sont agrégées pour un groupe suffisamment grand, elles tendent à s'annuler. Dans le cas des erreurs de cette nature, plus le groupe est grand, plus l'estimation correspondante est exacte. C'est pour cette raison que les utilisateurs sont invités à employer avec une certaine réserve les petites estimations. Par contre, d'autres erreurs peuvent se produire systématiquement et entraîner des estimations "biaisées". Comme le biais découlant de ces erreurs est persistant, peu importe la taille du

groupe pour lequel les réponses sont agrégées, et qu'il est particulièrement difficile à mesurer, les erreurs systématiques posent un plus grave problème à la plupart des utilisateurs des données que les erreurs aléatoires mentionnées plus haut.

En ce qui concerne les données du recensement en général, les principaux types d'erreur sont les suivants:

- les erreurs d'observation, qui se produisent lorsqu'on oublie des logements ou des personnes, qu'on les englobe à tort ou qu'on les compte deux fois:
- les erreurs dues à la non-réponse, qui découlent du fait qu'on n'a pas pu obtenir de réponses d'un petit nombre de ménages et(ou) de personnes à cause d'une absence prolongée ou pour toute autre raison;
- les erreurs de réponse, qui surviennent lorsque le répondant, et parfois le recenseur, a mal interprété une question du recensement et a inscrit une mauvaise réponse;
- les erreurs de traitement, qui peuvent se produire à diverses étapes, notamment: au codage, lorsque les commis transforment les réponses en toutes lettres en codes numériques; à la saisie des données, lorsque les préposés à l'introduction des données transfèrent sur les bandes pour ordinateur les réponses figurant sur le questionnaire du recensement; à l'imputation, lorsque l'ordinateur insère dans un enregistrement une réponse "valide", mais pas nécessairement exacte, pour remplacer des données manquantes ou "invalides" (une réponse est "valide" si elle est conforme aux autres renseignements de l'enregistrement, elle est "invalide" si elle n'est pas conforme);
- les erreurs d'échantillonnage, qui s'appliquent uniquement aux questions supplémentaires figurant sur la formule complète et s'adressant à un échantillon d'un cinquième des ménages; elles résultent du fait que les réponses à ces questions, lorsqu'elles sont pondérées pour représenter l'ensemble de la population, diffèrent inévitablement des résultats qu'on aurait obtenus si on avait posé ces questions à tous les ménages.

Les types d'erreur ci-dessus ont chacun une composante aléatoire et une composante systématique. Toutefois, la composante systématique des erreurs d'échantillonnage est généralement très faible par rapport à la composante aléatoire. Par contre, dans le cas des erreurs non dues à l'échantillonnage, les deux composantes peuvent être importantes.

ERREURS D'OBSERVATION

Les erreurs d'observation peuvent influer sur la précision des chiffres du recensement, c'est-à-dire la taille des divers univers du recensement: la population, les familles, les ménages et les logements. Bien qu'on ait pris quelques mesures pour corriger les erreurs identifiables, une certaine marge d'erreur subsiste toujours dans les chiffres définitifs du fait que des logements ou des personnes ont été oubliés, pris en compte par erreur dans le recensement ou comptés deux fois.

Si des logements ou des personnes n'ont pas été pris en compte alors qu'ils auraient dû l'être, on a un sous-dénombrement. Des logements peuvent être oubliés à la suite d'une mauvaise interprétation des limites des secteurs de dénombrement (SD) ou du fait que des logements sont cachés ou semblent inhabitables. Des personnes peuvent être oubliées quand le logement est oublié ou classé comme inoccupé, ou quand certains membres des ménages sont omis sur le questionnaire parce que le répondant a mal interprété les instructions concernant les personnes à inclure. Certaines personnes peuvent être oubliées parce qu'elles n'ont aucun lieu habituel de résidence et qu'elles ne se trouvaient dans aucun logement la nuit du recensement.

Les logements ou les personnes qui ont été pris en compte par erreur ou qui ont été comptés deux fois donnent lieu à un surdénombrement. Le surdénombrement des logements peut se produire lorsque des constructions ne convenant pas à l'habitation sont comptées comme des logements ou lorsque des unités qui ne correspondent pas à la définition d'un logement utilisée dans le recensement sont énumérées séparément au lieu d'être considérées comme faisant partie d'un grand logement. Le double compte des logements peut se produire, par exemple dans les cas où les limites des SD ne sont pas clairement définies. Les personnes peuvent être comptées deux fois parce que leur logement est compté deux fois ou parce que les lignes directrices concernant les personnes à inscrire dans le questionnaire ont été mal interprétées. Parfois, une personne qui n'habite pas habituellement le Canada peut être comptée, à tort, dans le recensement. En moyenne, le surdénombrement est moins susceptible de se produire que le sous-dénombrement; les chiffres des logements et des personnes sont donc probablement légèrement sous-estimés.

En 1986, on a entrepris quatre études pour mesurer les différents aspects des erreurs d'observation. Premièrement, on a revisité un échantillon des logements dénombrés comme inoccupés afin de vérifier s'ils étaient vraiment inoccupés le jour du recensement. On a rectifié les chiffres définitifs du recensement pour tenir compte des ménages oubliés parce que leur logement a été classé par erreur comme inoccupé. Deuxièmement, on a prélevé un échantillon des personnes dénombrées comme résidents temporaires pour vérifier si elles ont été dénombrées à leur lieu habituel de résidence. Au moyen de cet échantillon, on a pu estimer le nombre de personnes qui ont été oubliées parce qu'elles étaient temporairement absentes de leur lieu habituel de résidence. On a apporté les corrections correspondantes aux chiffres de population définitifs. Malgré ces corrections, les chiffres définitifs sont encore sujets à un certain sous-dénombrement. Pour l'ensemble du Canada et pour chaque province, on mesure l'ampleur de ce sous-dénombrement résiduel dans le recensement de 1986 au moyen d'une étude spéciale: la Contre-vérification des dossiers. Le sous-dénombrement est généralement plus élevé pour certains groupes de la population, tels que les jeunes hommes adultes et les récents immigrants. Le sous-dénombrement est compensé dans une certaine mesure par les erreurs de surdénombrement; en 1986, pour la première fois une étude spéciale est maintenant en cours, pour déterminer les erreurs de surdénombrement.

AUTRES ERREURS NON DUES À L'ÉCHANTILLONNAGE

Les erreurs d'observation font varier le nombre d'unités dans les divers univers du recensement, tandis que d'autres genres d'erreur font varier les caractéristiques de ces unités.

Il est parfois impossible d'obtenir d'un ménage une réponse complète, même si le logement a été jugé occupé et un questionnaire a été livré. Les membres du ménage ont pu s'absenter pendant toute la période du recensement ou, dans de rares cas, le chef de ménage a pu refuser de remplir le questionnaire. Il arrive plus souvent que le questionnaire est retourné, mais que les données fournies à certaines questions ou pour certaines personnes sont incomplètes. Nous déployons des efforts considérables pour obtenir la réponse la plus complète possible. Les recenseurs vérifient les questionnaires et effectuent des suivis s'il manque des données. Le travail des recenseurs est ensuite vérifié par un surveillant et un technicien du contrôle qualitatif. Malgré ces mesures, à la fin de

la phase de collecte des données, il manque un petit nombre de réponses. Bien que les entrées manquantes soient éliminées pendant le traitement des données, il peut toujours se glisser quelques erreurs dues à la non-réponse. Ce genre d'erreur est particulièrement grave si les non-répondants sont différents des répondants à certains égards puisque, comme on le décrit dans un paragraphe ultérieur, la valeur manquante est remplacée par une valeur correspondante tirée d'un dossier "similaire". Si certaines caractéristiques des non-répondants diffèrent de celles des répondants, cette méthode entraîne un biais dû à la non-réponse.

Même lorsqu'on obtient une réponse, il se peut qu'elle ne soit pas tout à fait précise. Le répondant peut avoir mal interprété la question ou avoir donné une réponse incertaine, surtout s'il a répondu pour un autre membre du ménage qui était peut-être absent. Ces erreurs sont appelées erreurs de réponse. Bien que les erreurs de réponse soient en général attribuables à des renseignements imprécis fournis par les répondants, elles peuvent parfois être liées à des erreurs qu'a faites le recenseur au moment où il a rempli certaines sections du questionnaire, comme le type de construction résidentielle, ou lorsqu'il a rappelé le répondant pour obtenir des données manquantes.

À certaines questions du recensement, il faut inscrire une réponse en toutes lettres. Pendant le dépouillement au bureau régional, on attribue un code numérique à ces réponses "écrites". Il peut alors se produire des <u>erreurs de codage</u>, surtout lorsque la liste des codes est longue (comme dans le cas de la langue, de l'origine ethnique, de l'industrie et de la profession) ou lorsque la réponse écrite est ambiguë, incomplète ou difficile à lire. En vérifiant un échantillon du travail de chaque préposé au codage et en prenant des mesures correctives s'il y a lieu, on peut contrôler les erreurs de codage, sans toutefois les éliminer complètement.

Après le codage et certaines autres étapes du dépouillement manuel des données, les renseignements figurant sur les questionnaires sont introduits sur clavier dans un fichier d'ordinateur. Deux procédures servent à contrôler le nombre d'erreurs à la saisie des données. Premièrement, certaines vérifications (comme le contrôle des tranches) sont effectuées au moment de l'introduction des données. Deuxièmement, un échantillon de chaque lot de documents est réintroduit et comparé à la série de données originale. Si le nombre d'erreurs dans la série originale est supérieur à un nombre déterminé, tout le lot doit être réintroduit.

Une fois que les données sont saisies, elles sont envoyées à Ottawa, où elles font l'objet d'une série de contrôles informatiques permettant de découvrir des réponses manquantes ou incohérentes. Dans le cas des réponses incohérentes, il faut d'abord décider quelle réponse doit être considérée non valide. Les réponses non valides ou manquantes doivent ensuite être remplacées par de bonnes réponses, c'est-à-dire par des réponses compatibles avec les autres données figurant sur l'enregistrement. Dans une faible proportion de cas, la bonne réponse peut être déduite à partir des autres données de l'enregistrement. Toutefois, dans la plupart des cas, cela est impossible, et la bonne réponse est tirée d'un enregistrement "donneur" choisi au hasard parmi un groupe d'enregistrements cohérents où un certain nombre de caractéristiques connexes sont similaires à celles de l'enregistrement incomplet. On ne peut bien sûr garantir que la valeur imputée sera nécessairement la bonne réponse pour la personne concernée. Néanmoins, si les enregistrements contenant des données non valides ou manquantes sont, en moyenne, similaires aux enregistrements valides, les erreurs à l'imputation sont plus ou moins éliminées lorsque les résultats sont totalisés pour une région géographique ou un sous-groupe de la population suffisamment important.

On mène actuellement diverses études pour évaluer la qualité des réponses obtenues dans le cadre du recensement de 1986. Pour chaque question, on a calculé des taux de réponse et des taux de rejet à la vérification. Ces taux peuvent servir à déterminer la présence possible d'erreurs dues à la non-réponse et d'autres erreurs. De plus, les totalisations du recensement de 1986 ont été, ou seront, comparées à des estimations correspondantes établies à partir de recensements antérieurs, d'enquêtes-échantillon (comme l'Enquête sur la population active) et de divers dossiers administratifs (comme les extraits de naissances et les rapports d'évaluation municipale). Ces comparaisons peuvent indiquer certains problèmes potentiels au niveau de la qualité ou du moins certaines incohérences entre les sources d'information.

En plus de ces comparaisons globales, on étudie actuellement les données de certains particuliers en comparant les réponses du recensement à une autre source de renseignements. Pour certaines caractéristiques "stables" (comme l'âge, le sexe, la langue maternelle, le lieu de naissance, etc.), les réponses obtenues au recensement de 1986 sont comparées aux renseignements fournis pour les mêmes personnes au recensement de 1981. De

plus, après le recensement de 1986, on a dénombré une seconde fois un échantillon de répondants, surtout pour déterminer les taux de surdénombrement. En même temps, les interviewers ont posé une série de questions détaillées sur la langue, l'origine ethnique et le type de construction résidentielle, et les réponses seront comparées aux réponses fournies au recensement, ce qui nous permettra de déterminer les erreurs de réponse et, nous l'espérons, de les comprendre.

ERREURS D'ÉCHANTILLONNAGE

Les estimations qui sont obtenues par la pondération des réponses recueillies auprès d'un échantillon sont sujettes à une erreur vu que la répartition des caractéristiques au sein de l'échantillon n'est habituellement pas identique à la répartition des caractéristiques au sein de la population à partir de laquelle l'échantillon a été prélevé.

L'erreur possible introduite par l'échantillonnage variera en fonction de la rareté relative de la caractéristique au sein de la population. Lorsqu'il y a des cases comportant des chiffres assez grands, l'erreur possible attribuable à l'échantillonnage, en proportion de la valeur de la case, sera relativement petite. Si les valeurs des cases sont petites, cette erreur, en proportion de la valeur de la case, sera toutefois relativement importante.

L'erreur possible due à l'échantillonnage est généralement exprimée en termes d'erreur type". Ceci est la racine carrée de la moyenne, tirée de tous les échantillons possibles de même taille et du même plan, de l'écart quadratique de l'estimation de l'échantillonnage à la valeur pour la population totale.

Le tableau à la page suivante présente une évaluation approximative de l'erreur type provenant de l'échantillonnage. Cette évaluation ne devrait servir que de guide.

Les utilisateurs qui désirent connaître l'erreur approximative provenant de l'échantillonnage pour une case de données en particulier, d'après l'échantillon de 20%, n'ont qu'à choisir la valeur de l'erreur type dans la colonne du tableau des erreurs types dont la rubrique est le plus près de la valeur de la case dans la totalisation du recensement. Lorsqu'il utilise la valeur obtenue de l'erreur type, l'utilisateur peut en général être raisonnablement certain que la valeur réelle de la population

recensée (si l'on ne tient compte d'aucune forme d'erreur autre que l'échantillonnage) se situera à plus ou moins trois fois l'erreur type (par exemple, pour une case dont la valeur est 1,000, l'écart s'étendra de 1,000 + ou - 3X65 ou 1,000 + ou - 195).

Les erreurs types données dans le tableau cidessous ne s'appliqueront pas aux totaux ou totaux partiels de la population ou de l'univers (personnes, ménages, logements ou familles) de la région géographique à l'étude (voir Échantillonnage et pondération). On peut connaître l'effet de l'échantillonnage sur ces cases en consultant la publication correspondante qui présente les données intégrales.

Les répercussions du plan d'échantillonnage et de la procédure de pondération utilisés au recensement de 1986 varieront cependant d'une caractéristique à une autre et d'une région géographique à l'autre. Les valeurs de l'erreur type dans le tableau ci-dessous pourront toutefois surestimer ou sous-estimer l'erreur provenant de l'échantillonnage.

Pour de plus amples renseignements sur la qualité des données du recensement, veuillez communiquer avec la Division des méthodes d'enquêtes sociales de Statistique Canada, Ottawa, Canada K1A 0T6 (613) 951-6929.

CONFIDENTIALITÉ ET ARRONDISSEMENT ALÉATOIRE

Par souci de confidentialité, les chiffres publiés dans le présent rapport ont subi un "arrondissement aléatoire" qui supprime toute possibilité d'associer des chiffres à une personne facilement reconnaissable. Grâce à cette méthode, tous les chiffres, y compris les totaux, sont arrondis de façon aléatoire (vers le haut ou vers le bas) jusqu'à

un multiple de "5". Cette technique assure une protection efficace contre la divulgation directe, par soustraction ou par méthode résiduelle, sans ajouter d'erreur significative aux données du recensement. Cependant, comme les totaux sont arrondis séparément, ils ne correspondent pas nécessairement à la somme des chiffres arrondis dans les répartitions. De plus, il faut s'attendre à ce que les totaux et les autres chiffres correspondants dans diverses totalisations du recensement présentent quelques légères différences. De même, la somme des pourcentages calculés à partir de chiffres arrondis ne correspond pas forcément à 100. Les répartitions en pourcentage et les taux sont dans la plupart des cas basés sur des données arrondies, alors que les variations en pourcentage et les moyennes sont basées sur des données non arrondies.

La distorsion importante pouvant résulter de l'arrondissement aléatoire lorsqu'il s'agit de cases de faible valeur préoccupe certains utilisateurs. Cette distorsion, qui assure la protection contre la divulgation, entraîne une perte de précision des cases de données renfermant des chiffres peu élevés. Cependant, comme il s'agit d'une méthode aléatoire, les erreurs dues à l'arrondissement ont tendance à disparaître lorsque les cases de données sont agrégées de nouveau. Il est aussi possible de réduire les distorsions en intégrant des totaux partiels dans les totalisations. On peut aussi choisir de demander des totalisations spéciales établies à partir des bases de microdonnées du recensement. Dans le cas de produits personnalisés, l'arrondissement aléatoire se fait après que les cases de données ont été agrégées, ce qui réduit la distorsion au minimum.

Outre l'arrondissement aléatoire, on a adopté d'autres techniques, telles que la suppression des régions et des cases, afin d'assurer encore mieux la confidentialité des réponses.

Dans le cadre de la suppression des régions, toutes les données caractéristiques se rapportant à la région géographique sont supprimées et remplacées par le symbole (XXX). La suppression

Tableau: Erreur type approximative provenant de l'échantillonnage des données-échantillon du recensement de 1986

Valeur des cases												
Erreur type	50	100	200	500	1,000	2,000	5,000	10,000	20,000	50,000	100,000	500,000
approxi- mative	15	20	30	45	65	90	140	200	280	435	600	1,300

des données se fait différemment selon qu'il s'agit d'une région normalisée, c.-à-d. regroupant des secteurs de dénombrement (une circonscription électorale fédérale, une division de recensement, une subdivision de recensement, un secteur de recensement, etc.) ou d'une région non normalisée pour laquelle l'utilisateur désire une totalisation spéciale. Les données sont supprimées si la population est inférieure à 40 personnes dans le cas des régions normalisées, et à 100 personnes lorsqu'il s'agit de régions non normalisées. Pour les tableaux renfermant des répartitions des revenus, on supprime aussi les données relatives aux régions dont la population est inférieure à 250 personnes. Toutefois, les données supprimées sont incluses dans les totaux, partiels ou non, à un niveau d'agrégation supérieur. Cette technique est appliquée à tous les produits renfermant des données infraprovinciales (c.-à-d. la série des Profils, les produits sommaires de base, les produits personnalisés et semi-personnalisés), qu'il s'agisse de données intégrales ou de données recueillies sur un échantillon de 20%.

Nota: Pour les données-échantillon, la suppression des régions est fondée sur la population hors institution plutôt que sur la population totale, étant donné qu'aucune donnée-échantillon n'a été recueillie pour la population des institutions.

Dans le cas de la suppression des cases, il faut préciser une valeur minimale acceptable. Toutes les cases dont la valeur est inférieure au seuil établi sont supprimées et remplacées par le symbole (XXX). Les données supprimées sont toutefois incluses dans les totaux, partiels ou non, à un niveau d'agrégation supérieur. Pour les données de 1986, on a mis en oeuvre deux méthodes différentes de suppression des cases. Dans le cas des publications de la série "Le Pays" et de la série "Dimensions" portant sur le revenu, la profession précise ou l'industrie précise, on supprime la répartition lorsqu'il s'agit de moins de 250 personnes ou unités. Dans le cas de totalisations personnalisées ou semi-personnalisées se rapportant à des variables recueillies à partir d'un échantillon, toutes les cases dont la valeur est de "5" (après arrondissement aléatoire) sont supprimées.

NOTES SPÉCIALES

CHIFFRES DE POPULATION BASÉS SUR LA RÉSIDENCE HABITUELLE

Les chiffres de population présentés ici pour les différentes régions géographiques indiquent le nombre de Canadiens qui y ont leur lieu habituel de résidence, sans égard au lieu où ils se trouvaient le jour du recensement. Sont également comptés les Canadiens séjournant dans un logement de la région en cause le jour du recensement et n'ayant pas de lieu habituel de résidence ailleurs au Canada. Dans la plupart des régions, il n'y a guère de différence entre le nombre de résidents habituels et le nombre de personnes séjournant dans la région le jour du recensement. Toutefois, dans certains endroits, comme les lieux de villégiature et les régions où sont situés des camps de chantier importants, la différence entre ces deux chiffres peut être importante.

RÉSERVES INDIENNES ET ÉTABLISSE-MENTS INDIENS PARTIELLEMENT DÉNOMBRÉS

Lors du recensement de 1986, le dénombrement n'a pas été autorisé sur certaines réserves indiennes et établissements indiens ou a dû être interrompu parce qu'on ne pouvait le mener à terme.

Les données de 1986 ne sont donc pas disponibles pour les réserves indiennes et les établissements indiens partiellement dénombrés et ne sont pas comprises dans les totalisations. Les données sur les régions géographiques ayant une ou plusieurs de ces réserves ou établissements font donc l'objet d'un nota approprié. En raison des données manquantes, les utilisateurs doivent prendre note que les comparaisons (par ex., des variations en pourcentage) entre 1981 et 1986 ne sont pas exactes pour les régions géographiques en cause. L'effet des données manquantes est très faible pour les régions géographiques de niveau plus élevé (Canada, provinces, régions métropolitaines de recensement et agglomérations de recensement) mais peut être plus important pour les petites régions où les réserves et établissements indiens en cause représentent une proportion plus grande de la population.

Bien qu'il soit impossible d'estimer la population de chaque réserve partiellement dénombrée, les estimations de la population totale manquante et du nombre total de logements privés occupés au niveau provincial ont été faites et sont présentées à l'annexe 1.

Pour de plus amples renseignements sur ce sujet, reportez-vous au Bulletin d'information à l'intention des utilisateurs, numéro 1, "Sommaire de la méthode utilisée pour l'estimation de la population et du nombre de logements privés occupés dans les réserves indiennes où le dénombrement a été incomplet".

Veuillez noter par contre qu'il a été impossible d'estimer les caractéristiques de la population manquante, même au niveau provincial.

PROFESSION

Les problèmes suivants sur la qualité des données doivent être pris en considération, lorsque l'on utilise la présente publication.

Tailleurs couturiers (8553) et opérateurs de machines à coudre (8563): Dans le sous-groupe 855-856, Professions reliées au travail du textile, de la fourrure et du cuir, il y a eu confusion lors du codage entre les tailleurs, les couturiers (8553) et les opérateurs de machines à coudre (8563), et ce, particulièrement dans la province de Québec. Conséquemment, au niveau de la province, le nombre de tailleurs et de couturiers est très élevé et ce, aux dépens des opérateurs de machines à coudre.

Travailleurs agricoles (7183, 7185, 7199): Les données attribuées aux travailleurs agricoles devraient être traitées avec prudence, car la dernière semaine de mai 1986 est reconnue comme étant la période de référence pour le recensement. En ce qui concerne les agriculteurs et les ouvriers agricoles dont les activités peuvent être l'élevage. la culture ou une combinaison des deux, ces travailleurs agricoles seront principalement occupés en cette période à la semence, à la plantation et autres travaux connexes. Les activités les plus reportées sur les questionnaires du recensement laissent supposer, conséquemment, que ces personnes seraient des cultivateurs. Ces ouvriers agricoles de cultures de plein champ (7185), pourraient être surclassifiés, principalement au dépens d'ouvriers agricoles de l'élevage (7183) et autres travailleurs en agriculture, en horticulture et en élevage, n.c.a. (7199).

Exploitants agricoles: Les données attribuées au sous-groupe (711), Exploitants agricoles, représentent un groupement des éleveurs (7113), des exploitants de cultures de plein champ (7115) et des exploitants agricoles, n.c.a. (7119). La qualité de données concernant ces sous-groupes fût considérée comme pauvre, face aux données attribuées aux travailleurs agricoles, et par conséquent, ces codes ont été amalgamés.

Directeurs généraux et autres cadres supérieurs (1130): Le groupe de base "directeurs généraux et autres cadres supérieurs (1130)" ne devrait pas être interprété comme étant exclusivement des directeurs généraux ou des directeurs d'une corporation. Ces personnes sont codés dans cette catégorie, alors que d'autres

répondants, qui se considèrent comme étant des directeurs généraux, ont eux aussi été assignés ce code. Le terme "directeurs généraux" est utilisé de plus en plus sur le marché du travail et les personnes concernées peuvent être chargées de multiples responsabilités. Leurs réponses au questionnaire du recensement sont très généralisées, ce qui est probablement dûe à la nature de leurs tâches connexes. On suggère d'utiliser les données du revenu d'emploi avec celles sur la profession comme guide en ce qui concerne les cadres supérieurs.

COMPARABILITÉ DES DONNÉES DES RECENSEMENTS DE 1981 ET 1986 SUR LE REVENU

Le concept du revenu total, utilisé au recensement de 1986, diffère légèrement de celui de 1981. Pour la première fois au recensement de 1986, les crédits d'impôt fédéral pour enfants sont compris dans le revenu total en espèces. Comme en 1981, les chiffres de 1986 sur le revenu des particuliers ne comprennent pas les pensionnaires d'institution et les chiffres sur le revenu des familles et des ménages se rapportent aux ménages privés seulement.

COMPARAISONS DES REVENUS ESTIMATIFS AUX CHIFFRES TIRÉS DES COMPTES NATIONAUX ET DE L'ENQUÊTE SUR LES FINANCES DES CON-SOMMATEURS

On a évalué les estimations du recensement sur le revenu en les comparant aux estimations du revenu des particuliers qui avaient été calculées aux fins des comptes nationaux. Après avoir ajusté les estimations sur le revenu des particuliers pour tenir compte des concepts et du champ d'observation, on a constaté que, dans l'ensemble, les estimations du recensement sur le revenu agrégé en 1985 étaient d'un peu plus de 90% supérieures aux estimations similaires des comptes nationaux. Les estimations du recensement pour certaines composantes du revenu se comparent mieux que d'autres. Les estimations du revenu d'emploi au recensement équivalent à 98% des estimations comparables dans les comptes nationaux. Les estimations du recensement sur les pensions de sécurité de la vieillesse et sur les allocations familiales sont très près des estimations semblables des comptes nationaux, mais les estimations du recensement sur les autres transferts gouvernementaux et les revenus de placement semblent être grandement sous-estimées.

93-116

Les statistiques du reccnsement sur le revenu ont également été comparées à des statistiques similaires tirées de l'Enquête annuelle sur les finances des consommateurs. Dans l'ensemble, les résultats ont été très satisfaisants. Les écarts observés entre les deux sources de données sur le revenu ont été imputés principalement aux erreurs d'estimation et à des variations au niveau de la couverture des univers.

ANNEXE 2: CLASSIFICATION DES PROFESSIONS DE 1980

LISTE DES GRANDS GROUPES, SOUS-GROUPES ET GROUPES DE BASE

GRAND GROUPE 11 - DIRECTEURS GÉRANTS, ADMINISTRATEURS ET PERSONNEL ASSIMILÉ

111 Administrateurs et cadres supérieurs propres au gouvernement

1111	Membres	des corps	légis.	latifs
------	---------	-----------	--------	--------

- 1113 Administrateurs gouvernementaux
- 1115 Chefs de bureau de poste
- 1116 Inspecteurs du gouvernement et fonctionnaires chargés de l'application des règlements
- 1119 Administrateurs et cadres supérieurs propres au gouvernement, n.c.a.

113/114 Autres directeurs et administrateurs

- 1130 Directeurs généraux et autres cadres supérieurs
- 1131 Directeurs, sciences naturelles et génie
- 1132 Directeurs, sciences sociales et domaines connexes
- 1133 Administrateurs, enseignement et domaines connexes
- 1134 Administrateurs, médecine et santé
- 1135 Directeurs des finances
- 1136 Directeurs des relations avec le personnel et des relations industrielles
- 1137 Directeurs des ventes et de la publicité
- 1141 Directeurs des achats
- 1142 Directeurs des services
- 1143 Directeurs de production
- 1145 Directeurs de travaux de construction
- 1146 Directeurs d'exploitations agricoles
- 1147 Directeurs, transports et communications
- 1149 (1151-1158) Autres directeurs et administrateurs, n.c.a. (dans les activités économiques suivantes):
 - 1151 Mines (y compris broyage), carrières et puits de pétrole
 - 1152 Manufacture de produits durables(1)
 - 1153 Manufacture de produits non durables(2)
 - 1154 Bâtiment et travaux publics

- 1155 Transports, communications et autres services publics
- 1156 Commerce
- 1157 Services socio-culturels, commerciaux et personnels
- 1158 Autres activités économiques et non précisées(3)

117 Cadres administratifs et travailleurs assimilés

- 1171 Comptables, vérificateurs et autres agents financiers
- 1173 Analystes de l'organisation et des méthodes
- 1174 Agents du personnel et travailleurs assimilés
- 1175 Acheteurs et agents d'approvisionnement, sauf commerces de gros et de détail
- 1176 Inspecteurs et agents chargés de l'application des règlements, n.c.a.
- 1179 Cadres administratifs et travailleurs assimilés, n.c.a.

GRAND GROUPE 21 - TRAVAILLEURS DES SCIENCES NATURELLES, DU GÉNIE ET DES MATHÉMATIQUES

211 Travailleurs spécialisés dans les sciences physiques

- 2111 Chimistes
- 2112 Géologues
- 2113 Physiciens
- 2114 Météorologues
- 2117 Technologues et techniciens en sciences physiques
- 2119 Travailleurs spécialisés dans les sciences physiques, n.c.a.

213 Travailleurs spécialisés dans les sciences biologiques et agronomiques

- 2131 Agronomes et scientifiques assimilés
- 2133 Biologistes et scientifiques assimilés
- 2135 Technologues et techniciens en sciences de la vie
- 2139 Travailleurs spécialisés dans les sciences biologiques et agronomiques, n.c.a.

OÙ NOUS TROUVER?

Les centres régionaux de consultation de Statistique Canada offrent la gamme complète des produits et services du recensement. On y trouve une bibliothèque et un comptoir de vente où les utilisateurs peuvent consulter ou acheter des publications du recensement, des disquettes de micro-ordinateurs, des microfiches, des cartes et plus encore. Chaque centre vous offre la possibilité d'extraire de l'information des systèmes de retrait de données automatisées CANSIM et TELICHART de Statistique Canada. Un service de renseignements téléphonique est également disponible; ce service est gratuit pour les clients se trouvant à l'extérieur des services d'appel locaux. On y offre également plusieurs autres services utiles, allant des séminaires aux consultations. Pour obtenir des renseignements, téléphonez ou écrivez au centre de consultation de votre région. Pour une description concise des produits et services du recensement de 1986, se reporter à la section "Lignes directrices pour l'utilisation de cette publication".

Note(s)

- † Excludes 1986 Census data for one or more incompletely enumerated Indian reserves or Indian settlements. For estimates of the missed population and dwellings, see Special Notes.
- .. Figures not available.
- ... Figures not appropriate or not applicable.
- Nil or zero.
- XXX Figures suppressed to protect confidentiality.

For additional information concerning the data, see "Special Notes" section of text.

Occupation data for 1981 and 1986 are based on the 1980 Standard Occupational Classification.

Tables 1 and 3

Occupations with less than 250 males or females are not shown separately but the suppressed data are included in the relevant totals.

Table 2:

Occupations with less than 10,000 males or 5,000 females are not shown separately but the suppressed data are included in the relevant totals.

Footnote(s)

- (1)...Worked 49-52 weeks in the reference year, mostly full time.
- (2)...Designates computer assignment of the "not stated" to occupation minor groups on the basis of selected socio-economic characteristics.
- (3) ... Includes "No schooling or kindergarten only".
- (4)...Includes 65 years and over.
- (5)...Includes self-employed in incorporated companies.
- (6)...See "Occupation" in the "Special Notes" section.
- (7)...Worked 49-52 weeks in 1985, mostly full time.

Abbreviation(s)

n.e.c.= not elsewhere classified.

Nota

- Ne comprend pas les données du recensement de 1986 pour une ou plusieurs réserves indiennes ou établissements indiens partiellement dénombrés. Pour une estimation de la population et des logements manquants, voir Notes spéciales.
- .. Nombres non disponibles.
- ... N'ayant pas lieu de figurer.
- Néant ou zéro.
- XXX Nombres supprimés afin de protéger la confidentialité.

Pour obtenir plus de renseignements concernant les données, voir la section "Notes spéciales" du texte.

Les données des professions de 1981 et 1986 sont basées sur la Classification type des professions, 1980.

Tableaux 1 et 3:

Les professions comprenant moins de 250 hommes ou femmes ne paraissent pas séparément, mais les données supprimées sont comprises dans les totaux pertinents.

Tableau 2:

les professions comprenant moins de 10,000 hommes ou moins de 5,000 femmes ne paraissent pas séparément, mais les données supprimées sont comprises dans les totaux pertinents.

Renvoi(s)

- ... A travaillé 49-52 semaines durant l'année de référence, surtout à plein temps.
- (2)...Désigne les assignations par ordinateur des catégories "non déclarées" aux sous-groupes des professions selon certaines caractéristiques socio-économiques.
- (3)...Comprend "Aucune scolarité ou uniquement l'école maternelle".
- (4) ... Comprend les personnes de 65 ans et plus.
- (5)...Comprend les travailleurs autonomes dans les entreprises constituées en société.
- (6) ... Voir "Profession" dans la section "Notes spéciales".
- (7)...A travaillé 49-52 semaines en 1985, surtout à plein temps.

Abréviation(s)

Decisions Décisions

ECISION DATA: The 1986 Census Data Base provides the definitive picture of Canada today and a Focus for the Future. Census products offer researchers, policy analysts and other decision makers maximum flexibility using a core data base together with a range of customized products: vital keys to quality research and good planning.

A corporation is scouting Canada for places to sell summer and winter sporting goods. Seeking target markets that conform to its client profiles, this company will need to look at incomes, occupation, age groups and even family structure to find the best locations. The Census Customized Service designed a package to meet the criteria.

A community association was asked to advise the municipal parks committee on the recreation plan for their area. Using census data on family formation, size and standard of living, the association concluded that a children's play area would be under used by the mostly older, working population. They proposed revenue-generating sports facilities be built instead.

Find out more about the 1986 Census Data Service from your nearest Statistics Canada Regional Office. ONNÉES DÉCISIVES: La base de données du recensement de 1986 permet de brosser un portrait définitif du Canada d'aujourd'hui et de faire voile vers l'avenir. Les produits du recensement offrent aux recherchistes, aux analystes des politiques et à d'autres décideurs un maximum de souplesse, et ce grâce à la base de données et à un éventail de produits personnalisés, secrets d'une recherche de qualité et d'une bonne planification.

Une compagnie parcourt le Canada à la recherche de points de vente d'équipement sportif d'été et d'hiver. Pour déterminer les marchés cibles répondant au profil de sa clientèle, bref, les meilleurs emplacements, cette compagnie devra passer en revue les données sur le revenu, la profession, les groupes d'âges et même la composition des familles. Le Service personnalisé du recensement répond précisément à ces besoins..

Une association communautaire devait conseiller le comité municipal des parcs sur le plan de récréation de leur région. En utilisant les données du recensement sur la formation et la taille des familles ainsi que sur le niveau de vie, l'association devait conclure qu'une aire de jeux pour les enfants serait sous-utilisée par la plupart des travailleurs et personnes plus âgées. L'association a donc proposé à la place la création d'installations sportives à but lucratif.

Pour de plus amples renseignements au sujet du Service de données du recensement, veuillez communiquer avec le bureau régional de Statistique Canada le plus près de chez vous.
